Preface

Originally, managing uncertainty and inconsistency has especially been explored in the field of artificial intelligence. During recent years, particularly with the availability of massive amounts of data in different repositories and the possibility of integrating and exploiting these data, technologies for managing uncertainty and inconsistency have started to play a key role in databases and the Web. Some of the most prominent of these technologies are probably the ranking algorithms behind Web search engines. Techniques for handling uncertainty and inconsistency are expected to play a similarly important role in the Semantic Web.

The annual International Conference on Scalable Uncertainty Management (SUM) has grown out of this very large interest on managing uncertainty and inconsistency in databases, the Web, the Semantic Web, and artificial intelligence. The conference aims at bringing together all those interested in the management of large volumes of uncertainty and inconsistency in these areas. The First International Conference on Scalable Uncertainty Management (SUM 2007) was held in Washington DC, USA, October 10–12, 2007.

This volume contains the papers presented at the Second International Conference on Scalable Uncertainty Management (SUM 2008), which was held in Naples, Italy, October 1–3, 2008. It contains 27 technical papers, which were selected out of 42 submitted papers in a rigorous reviewing process, where each paper was reviewed by at least three Program Committee members. The volume also contains extended abstracts of the three invited tutorials/talks.

We wish to thank all authors who submitted papers and all conference participants for fruitful discussions. We are grateful to Jan Chomicki, Prabhakar Raghavan, and Dan Suciu for their invited tutorials/talks at the conference. We would like to thank the Program Committee members and external referees for their timely expertise in carefully reviewing the submissions. Special thanks also to Antonio Picariello and his team from the University of Naples “Federico II” for the organization of the conference and wonderful days in Naples. Many thanks also to the developers of the EasyChair Conference System, which we used for the reviewing process and the preparation of this volume.

October 2008

Sergio Greco
Thomas Lukasiewicz

Organization

SUM 2008 was organized by the University of Naples “Federico II”.

General Chair

Antonio Picariello University of Naples “Federico II”, Italy

Program Chairs

Sergio Greco University of Calabria, Italy
Thomas Lukasiewicz Oxford University, UK

Program Committee

| | |
|--------------------------|---|
| Chitta Baral | Arizona State University, USA |
| Leopoldo Bertossi | Carleton University, Canada |
| Bir Bhanu | University of California-Riverside, USA |
| Fabio Gagliardi Cozman | University of Sao Paulo, Brazil |
| Luc de Raedt | K.U. Leuven, Belgium |
| Michael I. Dekhtyar | Tver State University, Russia |
| Debabrata Dey | University of Washington, USA |
| Jürgen Dix | TU Clausthal, Germany |
| Francesco M. Donini | University of Tuscia, Italy |
| Didier Dubois | IRIT, France |
| Thomas Eiter | TU Vienna, Austria |
| Nicola Fanizzi | University of Bari, Italy |
| Filippo Furfaro | University of Calabria, Italy |
| Avigdor Gal | Technion, Israel |
| John Grant | Towson University, USA |
| Pascal Hitzler | University of Karlsruhe, Germany |
| Eyke Hüllermeier | University of Marburg, Germany |
| Edward Hung | Hong Kong Polytechnic University |
| Anthony Hunter | University College London, UK |
| T.S. Jayram | IBM Almaden Research Center, USA |
| Gabriele Kern-Isberner | University of Dortmund, Germany |
| Christoph Koch | Cornell University, USA |
| Laks V.S. Lakshmanan | University of British Columbia, Canada |
| Mounia Lalmas | Queen Mary, University of London, UK |
| Kathryn Blackmond Laskey | George Mason University, USA |
| Nicola Leone | University of Calabria, Italy |
| Weiru Liu | Queen’s University Belfast, UK |

VIII Organization

| | |
|-----------------------|---------------------------------------|
| Serafin Moral | University of Granada, Spain |
| Simon Parsons | City University of New York, USA |
| Gabriella Pasi | University of Milan, Italy |
| Michael Pittarelli | State University of New York, USA |
| Henri Prade | IRIT, France |
| Andrea Pugliese | University of Calabria, Italy |
| Emad Saad | Abu Dhabi University, UAE |
| Domenico Saccà | ICAR-CNR, Italy |
| Maria Luisa Sapino | University of Turin, Italy |
| Umberto Straccia | ISTI-CNR, Italy |
| Heiner Stuckenschmidt | University of Mannheim, Germany |
| V.S. Subrahmanian | University of Maryland, USA |
| Maurice van Keulen | University of Twente, The Netherlands |

Sponsoring Institutions

This conference was partially supported by the Department of Electronics, Informatics, and Systems (DEIS) of the University of Calabria and by the Institute of High Performance Computing and Networking (ICAR) of the Italian National Research Council (CNR).

Table of Contents

| | |
|---|-----|
| Consistent Query Answering: The First Ten Years (Invited Tutorial) | 1 |
| <i>Jan Chomicki</i> | |
| Heavy Tails and Web Models (Abstract) (Invited Talk) | 4 |
| <i>Prabhakar Raghavan</i> | |
| Managing Probabilistic Data with MystiQ: The Can-Do, the Could-Do, and the Can't-Do (Invited Talk) | 5 |
| <i>Christopher Re and Dan Suciu</i> | |
| Frequent Itemset Mining from Databases Including One Evidential Attribute | 19 |
| <i>Mohamed Anis Bach Tobji, Boutheina Ben Yaghlane, and Khaled Mellouli</i> | |
| Evaluating Trustworthiness from Past Performances: Interval-Based Approaches | 33 |
| <i>Jonathan Ben-Naim and Henri Prade</i> | |
| A Comparative Study of Six Formal Models of Causal Ascription | 47 |
| <i>Salem Benferhat, Jean-François Bonnefon, Philippe Chassy, Rui Da Silva Neves, Didier Dubois, Florence Dupin de Saint-Cyr, Daniel Kayser, Farid Nouioua, Sara Nouioua-Boutouhami, Henri Prade, and Salma Smaoui</i> | |
| An Efficient Algorithm for Naive Possibilistic Classifiers with Uncertain Inputs | 63 |
| <i>Salem Benferhat and Karim Tabia</i> | |
| Transitive Observation-Based Causation, Saliency, and the Markov Condition | 78 |
| <i>Jean-François Bonnefon, Didier Dubois, and Henri Prade</i> | |
| A Family of Tolerant Antidivision Operators for Database Fuzzy Querying | 92 |
| <i>Patrick Bosc and Olivier Pivert</i> | |
| Uncertainty Management for the Retrieval of Economic Information from Distributed Markets | 106 |
| <i>René Brunner, Felix Freitag, and Leandro Navarro</i> | |
| Loopy Propagation in a Probabilistic Description Logic | 120 |
| <i>Fabio Gagliardi Cozman and Rodrigo Bellizia Polastro</i> | |

| | |
|---|-----|
| On the Performance of Fuzzy Data Querying | 134 |
| <i>Mariela Curiel, Claudia González, Leonid Tineo, and Angélica Urrutia</i> | |
| Tractable Reasoning with Bayesian Description Logics | 146 |
| <i>Claudia d'Amato, Nicola Fanizzi, and Thomas Lukasiewicz</i> | |
| Approximate Reasoning for Efficient Anytime Induction from Relational Knowledge Bases | 160 |
| <i>Nicola Di Mauro, Teresa M.A. Basile, Stefano Ferilli, and Floriana Esposito</i> | |
| Fusing Uncertain Structured Spatial Information | 174 |
| <i>Florence Dupin de Saint-Cyr, Robert Jeansoulin, and Henri Prade</i> | |
| A Neuro Fuzzy Approach for Handling Structured Data | 189 |
| <i>Alessio Ferone and Alfredo Petrosino</i> | |
| A Framework for the Partial Evaluation of SPARQL Queries | 201 |
| <i>Sergio Flesca, Filippo Furfaro, and Andrea Pugliese</i> | |
| An Evolutionary Perspective on Approximate RDF Query Answering | 215 |
| <i>Christophe Guéret, Eyal Oren, Stefan Schlobach, and Martijn Schut</i> | |
| Clustering Uncertain Data Via K-Medoids | 229 |
| <i>Francesco Gullo, Giovanni Ponti, and Andrea Tagarelli</i> | |
| Speeding Up the NRA Algorithm | 243 |
| <i>Peter Gurský and Peter Vojtáš</i> | |
| Uncertain Context Modeling of Dimensional Ontology Using Fuzzy Subset Theory | 256 |
| <i>Ying Jiang and Hui Dong</i> | |
| A Personalized Approach to Experience-Aware Service Ranking and Selection | 270 |
| <i>Friederike Klan and Birgitta König-Ries</i> | |
| Performance Evaluation of Algorithms for Soft Evidential Update in Bayesian Networks: First Results | 284 |
| <i>Scott Langevin and Marco Valtorta</i> | |
| Optimization of Queries over Interval Probabilistic Data | 298 |
| <i>Matteo Magnani and Danilo Montesi</i> | |
| Polynomial Time Queries over Inconsistent Databases | 312 |
| <i>Cristian Molinaro</i> | |
| Using OBDDs for Efficient Query Evaluation on Probabilistic Databases | 326 |
| <i>Dan Olteanu and Jiewen Huang</i> | |

| | |
|--|------------|
| A Logical Framework to Reinforcement Learning Using Hybrid Probabilistic Logic Programs | 341 |
| <i>Emad Saad</i> | |
| On the Relationship between Hybrid Probabilistic Logic Programs and Stochastic Satisfiability | 356 |
| <i>Emad Saad</i> | |
| Scaling Most Probable World Computations in Probabilistic Logic Programs | 372 |
| <i>Gerardo I. Simari, Maria Vanina Martinez, Amy Sliva, and V.S. Subrahmanian</i> | |
| Measuring the Ignorance and Degree of Satisfaction for Answering Queries in Imprecise Probabilistic Logic Programs | 386 |
| <i>Anbu Yue, Weiru Liu, and Anthony Hunter</i> | |
| Author Index | 401 |
