Preface

This volume contains the papers accepted for presentation at the 10th International Conference on Advanced Concepts for Intelligent Vision Systems (ACIVS 2008). Following the first meeting in Baden-Baden (Germany) in 1999, which was held as part of a large multiconference, the ACIVS conference then developed into an independent scientific event and has ever since maintained the tradition of being a single-track conference. We celebrate this year the 10th anniversary of ACIVS, the conference being held in France for the very first time. ACIVS currently attracts computer scientists from 33 different countries, mostly from Europe, Australia and Japan, but also from the USA, Asia and the Middle-East.

Although ACIVS is a conference on all areas of image and video processing, submissions tend to focus on certain major fields of interest. About a quarter of the selected papers deal with image and video coding and processing, including filtering and restoration. This year, topics related to biometrics (including face recognition), tracking, pattern recognition and scene understanding for security applications are covered by about a third of the papers, highlighting a growing interest in that area. Segmentation and feature extraction – which has been one of the cores of the conference over the years – has decreased slightly in importance. The remaining papers deal with systems and other applications such as medical imaging. We would like to thank the invited speakers Ivan Selesnick (Polytechnic University, NY, USA), Josiane Zérubia (INRIA, Sophia Antipolis, France) and Marc Antonini (Université de Nice Sophia Antipolis, France) for enhancing the technical program with their presentations.

A conference like ACIVS would not be feasible without the concerted effort of many people and the support of various institutions. The paper-submission and review procedure was carried out electronically and a minimum of three reviewers were assigned to each paper. From 179 submissions, 33 were selected for oral presentation and 74 as posters. A large and energetic Program Committee, helped by additional referees (about 140 people) – listed on the following pages – completed the long and demanding reviewing process. We would like to thank all of them for their timely and high-quality reviews. Also, we would like to thank our sponsors, DGA, NXP Semiconductors, Philips Research, Barco, Eurasip, the IEEE Benelux Signal Processing Chapter and the Flemish FWO Research Community on Audiovisual Systems, for their valuable support.

Last but not least, we would like to thank all the participants who trusted us to organize this event for the 10th time. We hope they found ACIVS 2008

stimulating and enjoyed the atmosphere of the social events in the seaside town of Juan-les-Pins.

Organization

ACIVS 2008 was organized by SEE (Société de l'Electricité, de l'Electronique et des Technologies de l'Information et de la Communication) and Ghent University.

Steering Committee

Jacques Blanc-Talon	DGA, Bagneux, France
Salah Bourennane	Ecole Centrale de Marseille, Marseille, France
Wilfried Philips	Ghent University - IBBT, Ghent, Belgium
Dan Popescu	CSIRO, Sydney, Australia
Paul Scheunders	University of Antwerp, Wilrijk, Belgium

Organizing Committee

Alain Appriou	ONERA, Châtillon, France
Frédéric Barbaresco	THALES, Limours, France
Jacques Blanc-Talon	DGA, Bagneux, France
Salah Bourennane	Ecole Centrale de Marseille, Marseille, France
Jean-Pierre Damiano	SEE, Nice, France
Béatrice Valdayron	SEE, Paris, France

Sponsors

ACIVS 2008 was sponsored by the following organizations:

- Philips Research
- DGA
- NXP Semiconductors
- The IEEE Benelux Signal Processing Chapter
- Eurasip
- Barco
- DSP Valley
- The FWO Research Community on Audiovisual Systems (AVS)

The ACIVS 2008 organizers are especially grateful to DGA and NXP Semiconductors for their financial sponsorship.
