The LNCS Journal on Data Semantics

Computerized information handling has changed its focus from centralized data management systems to decentralized data-exchange facilities. Modern distribution channels, such as high-speed Internet networks and wireless communication infrastructure, provide reliable technical support for data distribution and data access, materializing the new, popular idea that data may be available to anybody, anywhere, anytime. However, providing huge amounts of data on request often turns into a counterproductive service, making the data useless because of poor relevance or inappropriate level of detail. Semantic knowledge is the essential missing piece that allows the delivery of information that matches user requirements. Semantic agreement, in particular, is essential to meaningful data exchange.

Semantic issues have long been open issues in data and knowledge management. However, the boom in semantically poor technologies, such as the Web and XML, has boosted renewed interest in semantics. Conferences on the Semantic Web, for instance, attract big crowds of participants, while ontologies on their own have become a hot and popular topic in the database and artificial intelligence communities.

Springer's LNCS *Journal on Data Semantics* aims at providing a highly visible dissemination channel for remarkable work that in one way or another addresses research and development related to the semantics of data. The target domain ranges from theories supporting the formal definition of semantic content to innovative domain-specific application of semantic knowledge. This publication channel should be of the highest interest to researchers and advanced practitioners working on the Semantic Web, interoperability, mobile information services, data warehousing, knowledge representation and reasoning, conceptual database modeling, ontologies, and artificial intelligence.

Topics of relevance to this journal include:

- Semantic interoperability, semantic mediators
- Ontologies
- Ontology, schema and data integration, reconciliation and alignment
- Multiple representations, alternative representations
- Knowledge representation and reasoning
- Conceptualization and representation
- Multimodel and multiparadigm approaches
- Mappings, transformations, reverse engineering
- Metadata
- Conceptual data modeling
- Integrity description and handling
- Evolution and change
- Web semantics and semi-structured data

- Semantic caching
- Data warehousing and semantic data mining
- Spatial, temporal, multimedia and multimodal semantics
- Semantics in data visualization
- Semantic services for mobile users
- Supporting tools
- Applications of semantic-driven approaches

These topics are to be understood as specifically related to semantic issues. Contributions submitted to the journal and dealing with semantics of data will be considered even if they are not from the topics in the list.

While the physical appearance of the journal issues is like the books from the well-known Springer LNCS series, the mode of operation is that of a journal. Contributions can be freely submitted by authors and are reviewed by the Editorial Board. Contributions may also be invited, and nevertheless carefully reviewed, as in the case for issues that contain extended versions of the best papers from major conferences addressing data semantics issues. Special issues, focusing on a specific topic, are coordinated by guest editors once the proposal for a special issue is accepted by the Editorial Board. Finally, it is also possible that a journal issue be devoted to a single text.

The Editorial Board comprises an Editor-in-Chief (with overall responsibility), a Coeditor-in-Chief, and several members. The Editor-in-Chief has a four-year mandate. Members of the board have a three-year mandate. Mandates are renewable and new members may be elected at any time.

We are happy to welcome you to our readership and authorship, and hope we will share this privileged contact for a long time.

Stefano Spaccapietra
Editor-in-Chief

Previous Issues

- JoDS I: Special Issue on Extended Papers from 2002 Conferences, LNCS 2800, December 2003
Coeditors: Sal March and Karl Aberer
- JoDS II: Special Issue on Extended Papers from 2003 Conferences, LNCS 3360, December 2004
Coeditors: Roger (Buzz) King, Maria Orlowska, Elisa Bertino, Dennis McLeod, Sushil Jajodia, and Leon Strous
- JoDS III: Special Issue on Semantic-Based Geographical Information Systems, LNCS 3534, August 2005
Guest Editor: Esteban Zimányi
- JoDS IV: Normal Issue, LNCS 3730, December 2005
- JoDS V: Special Issue on Extended Papers from 2004 Conferences, LNCS 3870, February 2006
Coeditors: Paolo Atzeni, Wesley W. Chu, Tiziana Catarci, and Katia P. Sycara
- JoDS VI: Special Issue on Emergent Semantics, LNCS 4090, September 2006
Guest Editors: Karl Aberer and Philippe Cudre-Mauroux
- JoDS VII: Normal Issue, LNCS 4244, November 2006
- JoDS VIII: Special Issue on Extended Papers from 2005 Conferences, LNCS 4830, February 2007
Coeditors: Pavel Shvaiko, Mohand-Saïd Hacid, John Mylopoulos, Barbara Pernici, Juan Trujillo, Paolo Atzeni, Michael Kifer, François Fages, and Ilya Zaihrayeu
- JoDS IX: Special Issue on Extended Papers from 2005 Conferences (continued), LNCS 4601, September 2007
Coeditors: Pavel Shvaiko, Mohand-Saïd Hacid, John Mylopoulos, Barbara Pernici, Juan Trujillo, Paolo Atzeni, Michael Kifer, François Fages, and Ilya Zaihrayeu
- JoDS X: Normal Issue, LNCS 4900, February 2008
- JoDS XI: Special Issue on Extended Papers from 2006 Conferences, LNCS 5383, December 2008
Coeditors: Jeff Z. Pan, Philippe Thiran, Terry Halpin, Steffen Staab, Vojtech Svatek, Pavel Shvaiko, and John Roddick

JoDS Volume XII

This volume of JoDS results from a rigorous selection among 20 full papers submissions received in response to a call for contributions issued in July 2007.

Reviews of submitted papers resulted in requests for major revisions to authors of nine papers. Reviews of revised versions eventually led to the acceptance of five papers for publication. They are listed in the table of contents hereinafter.

This volume also hosts an extended version of a paper originally published in the COOPIS 2005 Conference. This paper had been selected for an extended version proposal, but a misunderstanding between the authors and conference chairs caused a halt in the preparation and review process. Once the misunderstanding cleared, the submission was updated and positively reviewed and accepted according to normal selection rules.

We would like to thank authors of all submitted papers as well as all the reviewers who contributed to improving the papers through their detailed comments.

The forthcoming volume XIII is a JoDS special issue on semantic data warehousing.

We hope you'll enjoy reading this volume.

Reviewers

We are very grateful to the external reviewers listed below who helped the editorial board in the reviewing task:

Yuan An	Drexel University, USA
Daniele Barone	University of Milano-Bicocca, Italy
Jesús Bermúdez	Basque Country University, Spain
Silvana Castano	University of Milan, Italy
Jos de Bruijn	Free University of Bozen-Bolzano, Italy
Ying Ding	University of Innsbruck, Austria
Gillian Dobbie	University of Auckland, New Zealand
Federico Michele Facca	STI Innsbruck, Austria
Alfio Ferrara	Università degli Studi di Milano, Italy
Marc-Philippe Huget	University of Savoie, France
Hanjo Jeong	George Mason University, USA

Stephen W. Liddle	Brigham Young University, USA
Andrea Maurino	University of Milano–Bicocca, Italy
Saravanan Muthaiyah	George Mason University, USA
Barry Norton	Open University, UK
Giorgio Orsi	Politecnico di Milano, Italy
Matteo Palmonari	University of Milano-Bicocca, Italy
Héctor Pérez-Urbina	University of Oxford, UK
Axel Polleres	National University of Ireland Galway, Ireland
Kleber Xavier Sampaio de Souza	Embrapa Agricultural Informatics, Brazil
Marco Schorlemmer	IIIA-CSIC, Spain
Rob Shearer	Oxford University Computing Laboratory, UK
Yannis Velegrakis	University of Trento, Italy

JoDS Editorial Board

Editor-in-Chief
Coeditor-in-Chief

Stefano Spaccapietra, EPFL, Switzerland
Lois Delcambre, Portland State University, USA

Members

Carlo Batini	Università di Milano-Bicocca, Italy
Alex Borgida	Rutgers University, USA
Shawn Bowers	University of California Davis, USA
Tiziana Catarci	Università di Roma La Sapienza, Italy
David W. Embley	Brigham Young University, USA
Jerome Euzenat	INRIA Alpes, France
Dieter Fensel	University of Innsbruck, Austria
Fausto Giunchiglia	University of Trento, Italy
Nicola Guarino	National Research Council, Italy
Jean-Luc Hainaut	FUNDP Namur, Belgium
Ian Horrocks	University of Manchester, UK
Arantza Illarramendi	Universidad del País Vasco, Spain
Larry Kerschberg	George Mason University, USA
Michael Kifer	State University of New York at Stony Brook, USA
Tok Wang Ling	National University of Singapore, Singapore
Shamkant B. Navathe	Georgia Institute of Technology, USA
Antoni Olivé	Universitat Politècnica de Catalunya, Spain
José Palazzo M. de Oliveira	Universidade Federal do Rio Grande do Sul, Brazil
Christine Parent	Université de Lausanne, Switzerland
Klaus-Dieter Schewe	Massey University, New Zealand
Heiner Stuckenschmidt	University of Mannheim, Germany
Pavel Shvaiko	TasLab, Trento, Italy
Katsumi Tanaka	University of Kyoto, Japan
Yair Wand	University of British Columbia, Canada
Eric Yu	University of Toronto, Canada
Esteban Zimányi	Université Libre de Bruxelles (ULB), Belgium
