Preface

Welcome to the European Conference on Software Architecture (ECSA), which is the premier European software engineering conference. ECSA provides researchers and practitioners with a platform to present and discuss the most recent, innovative, and significant findings and experiences in the field of software architecture research and practice. The fourth edition of ECSA was built upon a history of a successful series of European workshops on software architecture held from 2004 through 2006 and a series of European software architecture conferences from 2007 through 2009. The last ECSA was merged with the 8th Working IEEE/IFIP Conference on Software Architecture (WICSA).

Apart from the traditional technical program consisting of keynote talks, a main research track, and a poster session, the scope of the ECSA 2010 was broadened to incorporate other tracks such as an industry track, doctoral symposium track, and a tool demonstration track. In addition, we also offered several workshops and tutorials on diverse topics related to software architecture.

We received more than 100 submissions in the three main categories: full research and experience papers, emerging research papers, and research challenges papers. The conference attracted papers (co-)authored by researchers, practitioners, and academics from 30 countries (Algeria, Australia, Austria, Belgium, Brazil, Canada, Chile, China, Colombia, Czech Republic, Denmark, Finland, France, Germany, Hong Kong, Iceland, India, Ireland, Israel, Italy, The Netherlands, Poland, Portugal, Romania, Spain, Sweden, Switzerland, Tunisia, United Kingdom, United States).

Based on the recommendations of the Program Committee, we accepted only 19 full papers out of 75 full papers submitted. The acceptance rate for the full papers was 25.33% for ECSA 2010. In the "Emerging Research" category, we accepted only 2 out of 21 papers submitted. Based on the reviews and quality of the submissions, 18 full papers were invited to be converted into "Emerging Research" papers. For the "Research Challenges" (Poster) category, 5 out of 10 submissions were accepted. Two full research papers and three "Emerging Research" papers were invited to be presented as poster papers. Hence, there were 11 papers in this category. The Tool Demonstration Chairs accepted three out of six submitted papers.

It was a great pleasure to have three eminent keynote speakers at ECSA 2010. The opening day keynote was delivered by Jan Bosch from Intuit, USA. He spoke on "Architecture in the Age of Compositionality"; The second keynote was presented by Philippe Kruchten from the University of British Columbia, Canada, on "Where Did all This Good Architectural Knowledge Go?" The third and final keynote was delivered by Jim Webber from Thoughtsworks UK. Jim spoke about "REST Style Architectures in Practice for Building Very Large Scale Enterprise Systems."

We are grateful to the members of the Program Committee for helping us to seek submissions and provide valuable and timely reviews. Their efforts enabled us to put together a high-quality technical program for ECSA 2010. We are also indebted to members of the Organizing Committee of ECSA 2010 for playing an enormously important role in successfully organizing the event with several new tracks and

VI Preface

collocated events. We also thank the workshop organizers and tutorials presenters, who also made significant contributions to the success of an extended version of ECSA. A very special thanks is due to Vibeke Ervø for her enormous help in putting these proceedings together. The ECSA 2010 submission and review process was extensively supported by the EasyChair Conference Management System. We acknowledge the prompt and professional support from Springer, who published these proceedings in printed and electronic volumes as part of the *Lecture Notes in Computer Science* series. Finally, we are grateful to the management team of the IT University of Copenhagen, Denmark, for providing its facilities and professionally trained staff for the organization of ECSA 2010.

June 2010

Muhammad Ali Babar Ian Gorton

Organization

ECSA 2010 was hosted by the IT University of Copenhagen, Denmark.

Organizing Committee

General Chair: Ian Gorton (Pacific Northwest Laboratory, USA)
Program Chair: Muhammad Ali Babar (IT University of Copenhagen,

Denmark)

Industry Chairs: Ronny Kolb (Honeywell, Switzerland)

Martin Naedele (ABB Corporate Research,

Switzerland)

Workshop Chairs: Rafael Capilla (Rey Juan Carlos University, Spain)

Danny Weyns (Katholieke Universiteit Leuven,

Belgium)

Tutorial Chairs: Kasper Østerbye (IT University of Copenhagen,

Denmark)

Juha Savolainen (Nokia, Finland)

Tool Demo Chairs: Andrzej Wasowski (IT University of Copenhagen,

Denmark)

Michel Wermelinger (The Open University, UK)
Doctoral Symposium Eila Ovaska (VTT Technical Research Centre,

Chairs: Finland

Claudia Raibulet (University of Milano-Bicocca Italy)

Publicity Chair: Jennifer Perez Benedi (Technical University of

Madrid (UPM), Spain)

Local Organizing Chairs: Pia Dyrhagen (IT University of Copenhagen,

Denmark)

Yvonne Dittrich (IT University of Copenhagen,

Denmark)

Digital Media Chair: Hataichanok Unphon (IT University of Copenhagen,

Denmark)

Table of Contents

Keynote Talks	
Architecture in the Age of Compositionality	1
Where Did All This Good Architectural Knowledge Go?	5
REST in Practice	7
Full Research Papers	
An ADL-Approach to Specifying and Analyzing Centralized-Mode Architectural Connection	8
Naive Architecting - Understanding the Reasoning Process of Students: A Descriptive Survey	24
Towards Architecture-Centric Software Generation	38
An Architectural Blueprint for Model Driven Development and Maintenance of Business Logic for Information Systems	53
A Model for Dynamic Reconfiguration in Service-Oriented Architectures	70
Integrating Requirements and Design Decisions in Architecture Representation	86
Flexible Working Architectures: Agile Architecting Using PPCs Jennifer Pérez, Jessica Díaz, Juan Garbajosa, and Pedro P. Alarcón	102
Lightweight and Continuous Architectural Software Quality Assurance Using the aSQA Technique	118

Distributed Services	1:
·	
Automated Detection of Least Privilege Violations in Software Architectures	18
Architecting a Model-Driven Aspect-Oriented Product Line for a Digital TV Middleware: A Refactoring Experience Diego Saraiva, Lucas Pereira, Thais Batista, Flávia C. Delicato, Paulo F. Pires, Uirá Kulesza, Rodrigo Araújo, Tássia Freitas, Sindolfo Miranda, Ana Liz Souto, and Roberta Coelho	10
Impact Evaluation for Quality-Oriented Architectural Decisions regarding Evolvability	18
Functional Architecture Modeling for the Software Product Industry Sjaak Brinkkemper and Stella Pachidi	1
Experiences from Scenario-Based Architecture Evaluations with ATAM	2
Feature-Based Composition of Software Architectures	2
Linking Design Decisions to Design Models in Model-Based Software Development	2
Customer Value in Architecture Decision Making	2
A Formal Approach to Enforcing Consistency in Self-adaptive Systems	2
Architecture-Centric Component-Based Development Needs a Three-Level ADL Huaxi (Yulin) Zhang, Christelle Urtado, and Sylvain Vauttier	2
Emerging Research Papers	
Dynamic Architectural Constraints Monitoring and Reconfiguration in Service Architectures	3
Jose John, MingXue Wang, and Claus Pahl	,

Table of Contents	XIII
Using Domain Knowledge to Boost Software Architecture Evaluation Veli-Pekka Eloranta and Kai Koskimies	319
Independently Extensibile Contexts	327
Mediating Connector Patterns for Components Interoperability	335
Assessing the Impact of AOSD on Layered Software Architectures Juliana Saraiva, Sérgio Soares, and Fernando Castor	344
Explaining Architectural Choices to Non-architects Diego Bernini and Francesco Tisato	352
Reference Models and Reference Architectures Based on Service-Oriented Architecture: A Systematic Review Lucas Bueno Ruas de Oliveira, Katia Romero Felizardo, Daniel Feitosa, and Elisa Yumi Nakagawa	360
A Classification of Value for Software Architecture Decisions	368
BeeEye: A Framework for Constructing Architectural Views	376
Facilitating the Selection of Architectural Patterns by Means of a Marked Requirements Model	384
Modelling Changes and Data Transfers for Architecture-Based Runtime Evolution of Distributed Applications	392
Mining Relationships between the Participants of Architectural Patterns	401
Software Architecture Recovery Process Based on Object-Oriented Source Code and Documentation	409
Ontological Analysis for Generating Baseline Architectural Descriptions	417
Experiences in Making Architectural Decisions during the Development of a New Base Station Platform	425

Support of Middleware Platforms	433
Context-Aware Quality Model Driven Approach: A New Approach for Quality Control in Pervasive Computing Environments	441
Many to Many Service Discovery: A First Approach	449
Communicating Architectural Knowledge: Requirements for Software Architecture Knowledge Management Tools	457
Specifying Loose Coupling from Existing Service Composition Approaches	464
Research Challenges Papers	
Dynamic Adaptive Service Architecture – Towards Coordinated Service Composition	472
Identity Management Mismatch Challenges in the Danish Municipality Administration System	476
From Web Components to Web Services: Opening Development for Third Parties	480
Learning from the Cell Life-Cycle: A Self-adaptive Paradigm	485
Toward an Aspect Oriented ADL for Embedded Systems	489
On the Need of Safe Software Product Line Architectures	493
Expert Activities Automation through Enhanced Business Services Orchestration	497
Architecture Decision-Making in Support of Complexity Control	501

Table of Contents	XV
Software Architecture Constraints as Customizable, Reusable and Composable Entities	505
A Framework for Dynamic Self-optimization of Power and Dependability Requirements in Green Cloud Architectures	510
Identifying Architectural Connectors through Formal Concept Analysis of Communication Primitives	515
Tool Demo Papers	
MDA Tool for Telecom Service Functional Design	519
A NUI Based Multiple Perspective Variability Modeling CASE Tool Rabih Bashroush	523
ByADL: An MDE Framework for Building Extensible Architecture Description Languages	527
Author Index	533
