Preface

This volume contains the conference proceedings of the 4th International Symposium on Leveraging Applications of Formal Methods, Verification and Validation, ISoLA 2010, which was held in Greece (Heraklion, Crete) October 18–21, 2010, and sponsored by EASST.

Following the tradition of its forerunners in 2004, 2006, and 2008 in Cyprus and Chalchidiki, and the ISoLA Workshops in Greenbelt (USA) in 2005, in Poitiers (France) in 2007, and in Potsdam (Germany) in 2009, ISoLA 2010 provided a forum for developers, users, and researchers to discuss issues related to the adoption and use of rigorous tools and methods for the specification, analysis, verification, certification, construction, testing, and maintenance of systems from the point of view of their different application domains. Thus, the ISoLA series of events serves the purpose of bridging the gap between designers and developers of rigorous tools, and users in engineering and in other disciplines, and to foster and exploit synergetic relationships among scientists, engineers, software developers, decision makers, and other critical thinkers in companies and organizations. In particular, by providing a venue for the discussion of common problems, requirements, algorithms, methodologies, and practices, ISoLA aims at supporting researchers in their quest to improve the utility, reliability, flexibility, and efficiency of tools for building systems, and users in their search for adequate solutions to their problems.

The program of the symposium consisted of special tracks devoted to the following hot and emerging topics:

- Emerging services and technologies for a converging telecommunications/Web world in smart environments of the Internet of Things
- Learning techniques for software verification and validation
- Modeling and formalizing industrial software for verification, validation and certification
- Formal methods in model-driven development for service-oriented and cloud computing
- $\bullet\,$ Tools in scientific workflow composition
- New challenges in the development of critical embedded systems—an "aeromotive" perspective
- Web science
- Leveraging formal methods through collaboration
- Resource and timing analysis
- Quantitative verification in practice
- Worst case traversal time (WCTT)
- Model transformation and analysis for industrial scale validation
- Certification of software-driven medical devices
- Formal languages and methods for designing and verifying complex engineering systems

VI Preface

CONNECT: status and planEternalS: mission and roadmap

and five co-located events

- Graduate/postgraduate course on "Soft Skills for IT Professionals in Science and Engineering"
- RERS—challenge on practical automata learning
- IT Simply Works—editorial meeting (ITSy)
- CONNECT internal meeting
- EternalS Task Force meetings

We thank the Track organizers, the members of the Program Committee and their subreferees for their effort in selecting the papers to be presented.

Special thanks are due to the following organization for their endorsement: EASST (European Association of Software Science and Technology), and our own institutions—the TU Dortmund, and the University of Potsdam.

Table of Contents – Part II

EternalS: Mission and Roadmap	
Introduction to the EternalS Track: Trustworthy Eternal Systems via Evolving Software, Data and Knowledge	1
HATS: Highly Adaptable and Trustworthy Software Using Formal Methods	3
SecureChange: Security Engineering for Lifelong Evolvable Systems Riccardo Scandariato and Fabio Massacci	9
3DLife: Bringing the Media Internet to Life	13
LivingKnowledge: Kernel Methods for Relational Learning and Semantic Modeling	15
Task Forces in the Eternals Coordination Action	20
Modeling and Analyzing Diversity: Description of EternalS Task Force 1	23
Modeling and Managing System Evolution: Description of EternalS Task Force 2	26
Self-adaptation and Evolution by Learning: Description of EternalS Task Force 3	30
Overview of Roadmapping by EternalS	32
Formal Methods in Model-Driven Development for Service-Oriented and Cloud Computing	
Adaptive Composition of Conversational Services through Graph Planning Encoding	35

Performance Prediction of Service-Oriented Systems with Layered Queueing Networks	51
Error Handling: From Theory to Practice	66
Modeling and Reasoning about Service Behaviors and Their Compositions	82
Design and Verification of Systems with Exogenous Coordination Using Vereofy	97
A Case Study in Model-Based Adaptation of Web Services	112
Quantitative Verification in Practice	
Quantitative Verification in Practice (Extended Abstract)	127
Ten Years of Performance Evaluation for Concurrent Systems Using CADP	128
Towards Dynamic Adaptation of Probabilistic Systems	143
UPPAAL in Practice: Quantitative Verification of a RapidIO Network	160
Schedulability Analysis Using Uppaal: Herschel-Planck Case Study Marius Mikučionis, Kim Guldstrand Larsen, Jacob Illum Rasmussen, Brian Nielsen, Arne Skou, Steen Ulrik Palm, Jan Storbank Pedersen, and Poul Hougaard	175
Model-Checking Temporal Properties of Real-Time HTL Programs	191

CONNECT: Status and Plans	
Towards an Architecture for Runtime Interoperability	206
On Handling Data in Automata Learning: Considerations from the CONNECT Perspective	221
A Theory of Mediators for Eternal Connectors	236
On-The-Fly Interoperability through Automated Mediator Synthesis and Monitoring	251
Dependability Analysis and Verification for Connected Systems Felicita Di Giandomenico, Marta Kwiatkowska, Marco Martinucci, Paolo Masci, and Hongyang Qu	263
Towards a Connector Algebra	278
Certification of Software-Driven Medical Devices	
Certification of Software-Driven Medical Devices	293
Arguing for Software Quality in an IEC 62304 Compliant Development Process	296
Trustable Formal Specification for Software Certification	312
Design Choices for High-Confidence Distributed Real-Time Software Sebastian Fischmeister and Akramul Azim	327
Assurance Cases in Model-Driven Development of the Pacemaker Software	343

Modeling	and	Formaliz	ing I	ndustrial	Software	for
${f Verificatio}$						

Improving Portability of Linux Applications by Early Detection of Interoperability Issues	357
Specification Based Conformance Testing for Email Protocols Nikolay Pakulin and Anastasia Tugaenko	371
Covering Arrays Generation Methods Survey	382
Resource and Timing Analysis	
A Scalable Approach for the Description of Dependencies in Hard Real-Time Systems	397
Verification of Printer Datapaths Using Timed Automata	412
Resource Analysis of Automotive/Infotainment Systems Based on Domain-Specific Models – A Real-World Example	424
Source-Level Support for Timing Analysis	434
Practical Experiences of Applying Source-Level WCET Flow Analysis on Industrial Code	449
Worst-Case Analysis of Heap Allocations	464
Partial Flow Analysis with oRange	479
Towards an Evaluation Infrastructure for Automotive Multicore Real-Time Operating Systems	483

Table of Contents – Part II	XIII
Context-Sensitivity in IPET for Measurement-Based Timing Analysis	487
On the Role of Non-functional Properties in Compiler Verification Jens Knoop and Wolf Zimmermann	491
Author Index	497

Table of Contents - Part I

New Challenges in the Development of Critical Embedded Systems – An "aeromotive" Perspective
New Challenges in the Development of Critical Embedded Systems—An "aeromotive" Perspective
Certification of Embedded Software – Impact of ISO DIS 26262 in the Automotive Domain
Enforcing Applicability of Real-Time Scheduling Theory Feasibility Tests with the Use of Design-Patterns
Seamless Model-Driven Development Put into Practice
Timely Time Estimates
Compiler-Support for Robust Multi-core Computing
Formal Languages and Methods for Designing and Verifying Complex Embedded Systems
Thematic Track: Formal Languages and Methods for Designing and Verifying Complex Embedded Systems
Analyzing the Security in the GSM Radio Network Using Attack Jungles
Formal Modeling and Verification of Sensor Network Encryption Protocol in the OTS/CafeOBJ Method

Model-Driven Design-Space Exploration for Embedded Systems: The Octopus Toolset	90
Twan Basten, Emiel van Benthum, Marc Geilen, Martijn Hendriks, Fred Houben, Georgeta Igna, Frans Reckers, Sebastian de Smet, Lou Somers, Egbert Teeselink, Nikola Trčka, Frits Vaandrager, Jacques Verriet, Marc Voorhoeve, and Yang Yang	90
Contract-Based Slicing	106
Worst-Case Traversal Time (WCTT)	
Special Track on Worst Case Traversal Time (WCTT)	121
The PEGASE Project: Precise and Scalable Temporal Analysis for Aerospace Communication Systems with Network Calculus	122
NC-Maude: A Rewriting Tool to Play with Network Calculus	137
DEBORAH: A Tool for Worst-Case Analysis of FIFO Tandems Luca Bisti, Luciano Lenzini, Enzo Mingozzi, and Giovanni Stea	152
A Self-adversarial Approach to Delay Analysis under Arbitrary Scheduling	169
Flow Control with (Min,+) Algebra	184
An Interface Algebra for Estimating Worst-Case Traversal Times in Component Networks	198
Towards Resource-Optimal Routing Plans for Real-Time Traffic	214
Partially Synchronizing Periodic Flows with Offsets Improves Worst-Case End-to-End Delay Analysis of Switched Ethernet	228
Analyzing End-to-End Functional Delays on an IMA Platform	243

Tools in Scientific Workflow Composition	
Tools in Scientific Workflow Composition	258
Workflows for Metabolic Flux Analysis: Data Integration and Human Interaction	261
Wolfgang Wiechert, and Katharina Nöh	
Intelligent Document Routing as a First Step towards Workflow Automation: A Case Study Implemented in SQL	276
Combining Subgroup Discovery and Permutation Testing to Reduce Reduncancy	285
Semantically-Guided Workflow Construction in Taverna: The SADI and BioMoby Plug-Ins	301
Workflow Construction for Service-Oriented Knowledge Discovery Vid Podpečan, Monika Žakova, and Nada Lavrač	313
Workflow Composition and Enactment Using jORCA	328
A Linked Data Approach to Sharing Workflows and Workflow	0.40
Results	340
Emerging Services and Technologies for a Converging Telecommunications / Web World in Smart Environments of the Internet of Things	
Towards More Adaptive Voice Applications	355
Telco Service Delivery Platforms in the Last Decade - A R&D Perspective	367
Ontology-Driven Pervasive Service Composition for Everyday Life Jiehan Zhou, Ekaterina Gilman, Jukka Riekki, Mika Rautiainen, and Mika Ylianttila	375

Navigating the Web of Things: Visualizing and Interacting with Web-Enabled Objects	390
Shaping Future Service Environments with the Cloud and Internet of Things: Networking Challenges and Service Evolution	399
Relay Placement Problem in Smart Grid Deployment Wei-Lun Wang and Quincy Wu	411
Web Science	
Towards a Research Agenda for Enterprise Crowdsourcing	425
Analyzing Collaboration in Software Development Processes through Social Networks	435
A Web-Based Framework for Collaborative Innovation	447
A Distributed Dynamics for WebGraph Decontamination	462
Increasing Users' Trust on Personal Assistance Software Using a Domain-Neutral High-Level User Model	473
Understanding IT Organizations	488
On the 2-Categorical View of Proofs	502
Model Transformation and Analysis for Industrial Scale Validation	
WOMM: A Weak Operational Memory Model	519

Table of Contents – Part I	XIX
A Memory Model for Static Analysis of C Programs	535
Analysing Message Sequence Graph Specifications	549
Optimize Context-Sensitive Andersen-Style Points-To Analysis by Method Summarization and Cycle-Elimination	564
A Formal Analysis of the Web Services Atomic Transaction Protocol with UPPAAL	579
SPARDL: A Requirement Modeling Language for Periodic Control System	594
AutoPA: Automatic Prototyping from Requirements	609
Systematic Model-Based Safety Assessment Via Probabilistic Model Checking	625
Learning Techniques for Software Verification and Validation	
Learning Techniques for Software Verification and Validation – Special Track at ISoLA 2010	640
Comparing Learning Algorithms in Automated Assume-Guarantee Reasoning	643
Inferring Compact Models of Communication Protocol Entities	658
Inference and Abstraction of the Biometric Passport Fides Aarts, Julien Schmaltz, and Frits Vaandrager	673
From ZULU to RERS Lessons Learned in the ZULU Challenge Falk Howar, Bernhard Steffen, and Maik Merten	687
Author Index	705
