Preface

Intelligence and security informatics (ISI) is an interdisciplinary research area concerned with the study of the development and use of advanced information technologies and systems for national, international, and societal security-related applications. In the past few years, we have witnessed that ISI experienced tremendous growth and attracted significant interest involving academic researchers in related fields as well as practitioners from both government agencies and industry.

In 2006, the Workshop on ISI was started in Singapore in conjunction with PAKDD, with most contributors and participants from the Asia-Pacific region. The second Pacific Asia Workshop on ISI, PAISI 2007, was held in Chengdu. Following that, the annual PAISI workshop was held in Taipei (2008), Bangkok, Thailand (2009), and Hyderabad, India (2010).

Building on the momentum of these ISI meetings, we held PAISI 2011 together with IEEE ISI 2011 in Beijing, China, in July 2011. PAISI 2011 brought together technical and policy researchers from a variety of fields and provided a stimulating forum for ISI researchers in Pacific Asia and other regions of the world to exchange ideas and report research progress. This volume of Springer's *Lecture Notes in Computer Science* contains 13 research papers presented at PAISI 2011. It presents a significant view on regional data sets and case studies, including Asian language processing, infectious informatics, emergence response, and cultural computing.

PAISI 2011 was jointly hosted by the Chinese Academy of Sciences, the University of Arizona, and the University of Hong Kong.

We wish to express our gratitude to all members of the Workshop Program Committee and additional reviewers who provided high-quality, constructive review comments within a tight schedule. Our special thanks go to the members of the Workshop Organizing Committee, as well as Guanpi Lai and Yanqing Gao for their help. We would like to acknowledge the excellent cooperation with Springer in the preparation of this volume. Last but not least, we thank all researchers in the ISI community for their strong and continuous support of the PAISI series and other related intelligence and security informatics research.

Organization

Workshop Co-chairs

Hsinchun Chen	The University of Arizona, USA
Michael Chau	The University of Hong Kong
Daniel Zeng	Chinese Academy of Sciences and The University of Arizona
Wenji Mao	Chinese Academy of Sciences

Program Co-chairs

G. Alan Wang	Virginia Tech, USA
Xiaolong Zheng	Chinese Academy of Sciences

Program Committee

Ahmed Abbasi	University of Wisconsin-Milwaukee
Indranil Bose	The University of Hong Kong
Zhidong Cao	Chinese Academy of Sciences
Weiping Chang	Central Police University
Kuo-Tay Chen	National Taiwan University
Reynold Cheng	The University of Hong Kong
Uwe Glaesser	Simon Fraser University
Eul Gyu Im	Hanyang University
Hai Jin	Huazhong University of Science and Technology
Da-Yu Kao	Central Police University
Siddharth Kaza	Towson University
Paul Kwan	University of New England
Kai Lam	Chinese University of Hong Kong
Mark Last	Ben-Gurion University
Ickjai Lee	James Cook University
You-Lu Liao	Central Police University
Hongyan Liu	Tsinghua University
Hsin-Min Lu	The University of Arizona
Xin Luo	The University of New Mexico
Anirban Majumdar	SAP Research, SAP AG
Byron Marshall	Oregon State University
Robert Moskovitch	Ben-Gurion University
Dorbin Ng	The Chinese University of Hong Kong
Shaojie Qiao	Southwest Jiaotong University
Jialun Qin	University of Massachusetts Lowell

VIII Organization

Shrisha Rao	International Institute of Information Technology, Bangalore
Srinath Srinivasa	International Institute of Information Technology, Bangalore
Aixin Sun	Nanyang Technological University
Paul Thompson	Dartmouth College
Jau-Hwang Wang	Central Police University
Shiuh-Jeng Wang	Central Police University
Jennifer Xu	Bentley University
Wei Zhang	Tianjin University and Tianjin University of Finance and Economics
Yilu Zhou	George Washington University
William Zhu	University of Electronic Science and Technology of China

Additional Reviewers

Liwen Sun	The University of Hong Kong
Wai Kit Wong	The University of Hong Kong
Peng Xu	Huazhong University of Science and Technology

Table of Contents

Terrorism Informatics and Crime Analysis

Spatio-temporal Similarity of Web User Session Trajectories and Applications in Dark Web Research	1
<i>Sajimon Abraham and P. Sojan Lal</i>	
Specific Similarity Measure for Terrorist Networks: How Much Similar Are Terrorist Networks of Turkey?	15
<i>Fatih Ozgul, Ahmet Celik, Claus Atzenbeck, and Zeki Erdem</i>	
Social Network Analysis Based on Authorship Identification for Cybercrime Investigation	27
<i>Jianbin Ma, Guifa Teng, Shuhui Chang, Xiaoru Zhang, and Ke Xiao</i>	

Intelligence Analysis and Knowledge Discovery

Topic-Oriented Information Detection and Scoring	36
<i>Saike He, Xiaolong Zheng, Changli Zhang, and Lei Wang</i>	
Agent-Based Modeling of Netizen Groups in Chinese Internet Events . . .	43
<i>Zhangwen Tan, Xiaochen Li, and Wenji Mao</i>	
Estimating Collective Belief in Fixed Odds Betting	54
<i>Weiyun Chen, Xin Li, and Daniel Zeng</i>	

Information Access and Security

Two Protocols for Member Revocation in Secret Sharing Schemes	64
<i>Jia Yu, Fanyu Kong, Xiangguo Cheng, and Rong Hao</i>	
Dual-Verifiers DVS with Message Recovery for Tolerant Routing in Wireless Sensor Networks	71
<i>Mingwu Zhang, Tsuyoshi Takagi, and Bo Yang</i>	

Infectious Disease Informatics

A Geospatial Analysis on the Potential Value of News Comments in Infectious Disease Surveillance	85
<i>Kainan Cui, Zhidong Cao, Xiaolong Zheng, Daniel Zeng, Ke Zeng, and Min Zheng</i>	

Using Spatial Prediction Model to Analyze Driving Forces of the Beijing 2008 HFMD Epidemic	94
<i>JiaoJiao Wang, Zhidong Cao, QuanYi Wang, XiaoLi Wang, and Hongbin Song</i>	
An Online Real-Time System to Detect Risk for Infectious Diseases and Provide Early Alert	101
<i>Liang Fang and Zhidong Cao</i>	
The Impact of Community Structure of Social Contact Network on Epidemic Outbreak and Effectiveness of Non-pharmaceutical Interventions	108
<i>Youzhong Wang, Daniel Zeng, Zhidong Cao, Yong Wang, Hongbin Song, and Xiaolong Zheng</i>	
Modeling and Simulation for the Spread of H1N1 Influenza in School Using Artificial Societies	121
<i>Wei Duan, Zhidong Cao, Yuanzheng Ge, and Xiaogang Qiu</i>	
Author Index	131
