# Preface

Africa is a continent of diversity that is facing dramatic changes in its social, political, and economical environments. Its population is reaching for the billion, and in particular young Africans demand their share of social inclusion, educational opportunities, and prosperity.

Information and communication infrastructures provide the basis to access knowledge worldwide, blurring social and economic differences while opening opportunities that never existed before. E-services enable or enhance health-care, agro-business, higher education, and social participation.

Its history, its geography, its (low) population density, and its culture make Africa different from regions in the world where ICT provides ubiquitous access. Technologies as well as services need to be adapted to local challenges. An example are the submarine cables that are becoming available, providing huge capacities at the landing spots but that now need to be connected to the inland population. There is no time to waste, because young Africans will not accept the digital divide. The Internet must come to every household, or the young population will leave their home environment in search for a better future.

The challenge is to reduce operational and capital cost to provide affordable connectivity to all. Services must be adapted to local needs, and business concepts must meet local requirements. New ideas must be tested and prove their superiority; they need to be evaluated, discussed, and challenged.

This is where the AFRICOMM conference comes in. For several years now it provides an open forum where researchers and politicians can discuss new ideas and new challenges. While some of us see the M-services as the logical next step in ICT evolution (which takes place in Africa first), others see them as an intermediate step based on the fact that low-bandwidth services are required because low-bandwidth networks need to be used. Should applications adapt to frequent network failures, or should networks be improved and become more reliable? Probably both, and small steps toward the all-inclusive ICT future were made at this year's AFRICOMM.

Energy efficiency has been a challenge in Africa for many years and is now becoming a hype in Europe as well. And, finally, is the (ICT) situation for rural communities in Europe, the USA or Australia so much different from the situation in rural Africa? While Europeans took advantage of the fact that a monopoly of operators installed copper networks all over the countries, these networks do not meet the requirements of high bandwidth for all. New ideas are required but not only for Africa; perhaps the technological future starts in Africa. Above all, developing countries need relevant content in computing disciplines to spur development. Does it suffice to teach in Africa the same computing programs that are taught in developed worlds? AFRICOMM 2011 provided answers to these questions.

The African continent is, more than ever, in need of cutting-edge and relevant e-infrastructures, e-services, and enabling policies. AFRICOMM was established in 2009 in Mozambique and continued 2010 in Cape Town as a series of annual conferences. Its contributions have been published in the Springer's *Lecture Notes on ICST*.

This book contains the proceedings of AFRICOMM 2011, which was held in Zanzibar. The book contains high-quality papers thanks to the effective and highly specialized Technical Program Committee, which also diligently selected the best paper that was awarded at AFRICOMM 2011. The best paper is entitled "Relevant Computing Curricula in Sub-Saharan Africa," written by Anthony Rodrigues, Isabella Venter, Godfrey Mills, Hussein Suleman, John Edumadze and Idris Rai from universities in Kenya, Uganda, South Africa, and Ghana.

# Organization

## Conference Committee

### Honorary Chair

Radu Popescu-Zeletin

Fraunhofer FOKUS, Germany

### General Chair

Karl Jonas

Fraunhofer FOKUS, Germany

### TPC Chair

Idris A. Rai

Makerere University, Uganda

### TPC Chair - Communication Infrastructures in Developing Countries

Roch Glitho

Concordia University, Canada

### TPC Chair - Track on Electronic Service, ICT Policy, and Regulatory Issues for Developing Countries

Adolfo Villaflorida

FBK Center for Information Technology, Italy

Darelle Van Greunen

NMMU, South Africa

### Sponsorship Chair

Alessandro Zorer

CREATE-NET, Italy

### Local Chair

Omar Fakh Hamad

University of Dar-es-salam, Tanzania

Adnan Ali

State University of Zanzibar, Tanzania

### Publicity Chairs

Henning Köhler

Fraunhofer, Germany

Wolf Konrad

Fraunhofer, Germany

Idris A. Rai	Makerere University, Uganda
Andy Rice	Cambridge University, UK
Anthony J. Rodriguez	University of Nairobi, Kenya
Leila Azouz Saidane	National School of Computer Sciences (ENSI), Tunisia
Julianne Sansa	Makerere University, Uganda
Hans D. Schotten	Karlsruhe University, Germany
Guy Tanonkou	ACSAL Luxembourg
Kentaro Toyama	University of California at Berkeley, USA
Bill Tucker	University of Western Cape, South Africa
Isabella Venter	University of Western Cape, South Africa
Adolfo Villafiorita	FBK Center for Information Technology, Italy
Komminist Weldemariam	Fondazione Bruno Kessler, Trento, Italy

# Table of Contents

## Track I: Communication Infrastructures for Developing Countries

Scenario to Serve Remote Areas in Emerging Countries with the Village Internet Service Station . . . . .	1
<i>Gaël Fromentoux, Arnaud Braud, and Xavier Marjou</i>	
Enhancing Service Provisioning within Heterogeneous Wireless Networks for Emergency Situations . . . . .	14
<i>Christian Lottermann, Andreas Klein, Hans D. Schotten, and Christian Mannweiler</i>	
Providing Some Quality of Service for Secondary Users in Cognitive Radios Using Time Slotted Systems . . . . .	24
<i>Hudson Okii and Idris A. Rai</i>	
Fair Usage and Capping for Providing Internet for All in Developing Countries . . . . .	35
<i>Yvon Gourhant, Ali Gouta, and Venmani Daniel Philip</i>	
OpenFlow as an Architecture for e-Node B Virtualization . . . . .	49
<i>Venmani Daniel Philip, Yvon Gourhant, and Djamal Zeglache</i>	
The White Space Opportunity in Southern Africa: Measurements with Meraka Cognitive Radio Platform . . . . .	64
<i>Moshe T. Masonta, David Johnson, and Mjumo Mzyece</i>	
Strategies for Energy-Efficient Mobile Web Access: An East African Case Study . . . . .	74
<i>Le Wang, Edward Mutafungwa, Yeswanth Puvvala, and Jukka Manner</i>	
Scalable Scheduling with Burst Mapping in IEEE 802.16e (Mobile) WiMAX Networks . . . . .	84
<i>Mukakanya Abel Muwumba and Idris A. Rai</i>	
A Pilot of a QoS-Aware Wireless Back-Haul Network for Rural Areas . . . . .	96
<i>Philipp Batroff, George Ghinea, Thorsten Horstmann, Karl Jonas, and Jens Moedecker</i>	
SolarMesh - Energy-Efficient, Autonomous Wireless Networks for Developing Countries . . . . .	106
<i>Christian Mannweiler, Christian Lottermann, Andreas Klein, and Hans D. Schotten</i>	

Critical Information Infrastructure Protection (CIIP) and Cyber Security in Africa – Has the CIIP and Cyber Security Rubicon Been Crossed? .....	116
<i>Basie von Solms and Elmarie Kritzinger</i>	

Geographic Information System as a Tool for Integration of District Health Information System and Drug Logistics Management Information System in Malawi .....	125
<i>Patrick Albert Chikumba and Auxilia Nyaukaya Kaunda</i>	

## **Track II: Electronic Services, ICT Policy, and Regulatory Issues for Developing Countries**

A Socio-technical Perspective on the Use of Mobile Phones for Remote Data Collection in Home Community Based Care in Developing Countries .....	135
<i>Nobubele Angel Shoji, Dalenca Pottas, and Nicky Mostert-Phipps</i>	

Open Source Software Solution for Healthcare: The Case of Health Information System in Zanzibar .....	146
<i>Yahya Hamad Sheikh and Abubakar Diwani Bakar</i>	

A Software Business Incubation Model Using ICTs for Sustainable Economic Development in Uganda .....	156
<i>Hugh Cameron, Benjamin Kanagwa, and Michael Niyitegeka</i>	

Crowdsourcing ICTD Best Practices .....	167
<i>Aaron Ciaghi and Adolfo Villafiorita</i>	

Information and Communication Technologies and Firms Productivity in Cameroon .....	177
<i>Pierre Valère Nketcha Nana and Christophe Péguy Choub Faha</i>	

e-Health for Rural Areas in Developing Countries: Lessons from the Sebokeng Experience .....	187
<i>Massimiliano Masi, Rosario Pugliese, and Francesco Tiezzi</i>	

On Development of a Collaborative ICT Infrastructure for Online HIV/AIDS Advisory Service Provision .....	197
<i>Simon Samwel Msanjila</i>	

Socio-technical Arrangements for mHealth: Extending the Mobile Device Use and Adoption Framework .....	208
<i>Tiwonge Davis Manda and Yamiko Msosa</i>	

Power Dynamics in E-commerce Adoption in Least Developing Countries: The Case of Dar-es-Salaam SMEs, Tanzania .....	218
<i>Salah Kabanda</i>	

The Expansion of the Siyakhula Living Lab: A Holistic Perspective . . . . .	228
<i>Lorenzo Dalvit, Ingrid Siebörger, and Hannah Thinyane</i>	
Effect of Attitude towards SMS Technology and Its Applications on Blood Donation Behaviour . . . . .	239
<i>Harry H. Gombachika and Maganizo D. Monawe</i>	
The Intelligent City Operations Centre: An Integrated Platform for Crisis Management . . . . .	248
<i>Mweene Monze</i>	
Enabling New Interaction Forms and Applications through Next Generation Mobile Platforms for Urban and Rural Africa . . . . .	258
<i>Kasper Løvborg Jensen and Gary Marsden</i>	
<b>Author Index . . . . .</b>	<b>261</b>
