

H. Ehrig B. Mahr

Fundamentals of Algebraic Specification 1

Equations and Initial Semantics

Springer-Verlag
Berlin Heidelberg New York Tokyo

Contents

Introduction	1
Historical Remarks	1
The Chapters of this Volume	4
Further Topics	8
 1 Equational Specifications and Algebras	 9
Basic Examples	10
Signatures, Terms, and Algebras	14
Equational Specifications and Derivations	24
Bibliographic Notes for Chapter 1	31
 2 Specifications of Abstract Data Types	 32
Abstract Data Types	33
Quotient Term Algebras	36
Semantics and Correctness of Specifications	46
Bibliographic Notes for Chapter 2	61
 3 Initial Semantics of Specifications	 62
Facts about Homomorphisms	63
Term Algebras, Initial and Free Algebras	67
Congruences and Quotients	76
Initial and Free SPEC-Algebras	81
Bibliographic Notes for Chapter 3	88

4	Specifiability and Characterization of Equational Classes . . .	89
	Equational Theory and Equational Classes	90
	Subalgebras	92
	Products	95
	Homomorphic Images	97
	Birkhoff-Characterizations of Equational Classes	101
	Bibliographic Notes for Chapter 4	107
5	Equational Calculus and Term Rewriting	108
	Formal Proofs by Equations	109
	Correctness and Completeness of the Equational Calculus . . .	115
	Term Rewriting with Equations	124
	Equivalence of Proofs and Term Rewriting with Equations . . .	130
	Bibliographic Notes for Chapter 5	137
6	Correctness and Extension of Specifications	138
	Initial Correctness of Specifications	139
	Correctness of Specifications with Hidden Functions	145
	Stepwise Specification by Extensions	151
	Correctness of Example Specifications	158
	Bibliographic Notes for Chapter 6	167
7	Parameterized Specifications and Functors	168
	Parameterized Specifications	171
	Categories and Functors	176
	Free Constructions and Free Functors	181
	Semantics and Correctness of Parameterized Specifications . . .	191
	Bibliographic Notes for Chapter 7	199
8	Parameter Passing	201
	Specification Morphisms	202
	Standard Parameter Passing and Pushouts	206
	Amalgamation	215
	Persistency and Extension of Functors	220
	Correctness of Standard Parameter Passing	226
	Parameterized Parameter Passing	231
	Iterated Parameter Passing	238
	Bibliographic Notes for Chapter 8	242

Appendix	244
9 Concepts of a Specification Language	245
Basic Specifications	246
Combination	250
Renaming	256
Actualization	258
Modularization	263
Syntax of the Specification Language ACT ONE	268
10 Semantics of the Specification Language ACT ONE	273
First Level of Semantics	275
Second Level of Semantics	282
Semantical Properties and Context-Conditions	290
Initial Algebra Semantics	298
Bibliographic Notes for the Appendix	305
Bibliography	307
Subject Index	316
