Foreword

This book is aimed first and foremost at people involved in software and product development – product managers, project managers, consultants and analysts, who face the major challenge of developing highly useful and usable products. Our objective is to provide you with an expert overview of the subject. You will find answers to the following questions:

- What is user-centred engineering?
- How do user-centred activities fit into the development process?
- How do I schedule user-centred techniques and what is the process involved?
- What results will I obtain and how can I verify them?
- How can I establish a user-centric culture within my business?
- What related fields are there and where can I find further information?

However, you *won't* find in this book:

- Rules, adherence to which guarantees great user experiences
- Cookbook instructions to improve usability
- User interface guidelines for developers
- Theory which has no practical application

We hope also to provide interested lay readers with an easily comprehensible introduction to the subject. As users of technical systems, we all have a choice – either we accept what is put in front of us or we don't. Of course it is not always possible to switch to a different product whenever we feel the need, but even then we can at least contribute to improving the existing one. The first step is to understand how this can be achieved.

Contents

1	Introduction	1
1.1	We Are All Users	1
1.2	The User Is Not Like Me	2
1.3	What Is User-Centred Engineering?	3
1.4	Lessons from History	8
2	User-Centred Engineering	11
2.1	Software Engineering: The Forgotten User?	11
2.2	Overview: User-Centred Techniques in Context	15
3	The 7 ± 2 Most Important User-Centred Techniques	25
3.1	Aspects of Life: Contextual Inquiry	25
3.2	Modelling Reality: Personas and Scenarios	32
3.3	Just Communicate: Storyboards	39
3.4	Scribbling for Intermediates: UI Prototyping	42
3.5	Taking It Forward into Development: Use Cases	51
3.6	Guidelines and Style Guides	57
3.7	Usability Testing	62
3.8	Numerical Data: Questionnaires	68
4	Getting a Handle on UX: Planning	75
4.1	Achieving Goals	75
4.2	Controlling Risk	76
4.3	Constraints	77
4.4	Some Planning Examples	78
4.5	Involving Users	82
4.6	Tricky Situations	84
4.7	“It’s Carl’s Job”	87
5	A User-Oriented Strategy: Company-Wide UX	89
5.1	User-Centred Engineering as a Feedback Loop	89
5.2	Building a User-Centred Process	90
5.3	Creating a Common Language	92
5.4	Establishing a User-Oriented Company Culture	94
5.5	So What’s the Story in Your Company?	96

6	That's Life: Examples from Actual Practice	99
6.1	Case Study 1: User-Centred Requirements Clear the Air	99
6.2	Case Study 2: User-Centred Engineering from A to Z	102
6.3	Case Study 3: User-Centred Innovation: Simulating Reality	106
6.4	Case Study 4: Discount Usability Engineering	110
7	Flashback: Principles of User-Centred Engineering	113
7.1	Identifying the Question: A Goal-Oriented Approach	113
7.2	Context: Designing for Reality	114
7.3	Partnership: Involving Users Constructively	115
7.4	Interpreting Factual Information	116
7.5	Modelling and Collecting Feedback	116
8	Outlook: Related Fields	117
8.1	Accessibility	117
8.2	Interaction Design	118
8.3	Security and Usability	119
8.4	Web Usability	119
8.5	Mobile User Experience	120
8.6	The Ubiquitous Computer	123
	Glossary	127
	Bibliography	131
	Index	135
