Preface

The 28th International Conference on Database and Expert Systems Applications—DEXA 2017—took place in Lyon, France, during August 28–31, 2017. DEXA is an annual conference, designed for researchers interested in some aspects of database, information, and knowledge systems. DEXA 2017 attracted 166 submissions from all over the world. The DEXA 2017 chairs accepted 37 full research papers and 37 short research papers yielding an acceptance rate of 22% for each type of accepted papers.

Among the 37 full papers, we selected 11 papers for their quality and asked authors to extend their papers for a possible inclusion in the TLDKS journal. Finally, only seven papers were accepted and are included in this volume.

The success of this TLDKS special issue of DEXA 2017 would not have been possible without the help of Gabriela Wagner as manager of the DEXA organization, and the professional and hard work of the reviewers. We gratefully thank them for their commitment to this scientific event.

For the readers of this volume, we hope you will find it interesting. We also hope it will inspire you to greater achievements.
