# Preface

This volume contains selected and thoroughly revised papers plus contributions from invited speakers presented at the *First International Workshop on Constraint Solving and Language Processing*, held in Roskilde, Denmark, September 1–3, 2004.

Constraint Programming and Constraint Solving, in particular Constraint Logic Programming, appear to be a very promising platform, perhaps the most promising present platform, for bringing forward the state of the art in natural language processing, this due to the naturalness in specification and the direct relation to efficient implementation. Language, in the present context, may refer to written and spoken language, formal and semiformal language, and even general input data to multimodal and pervasive systems, which can be handled in very much the same ways using constraint programming.

The notion of constraints, with slightly differing meanings, apply in the characterization of linguistic and cognitive phenomena, in formalized linguistic models as well as in implementation-oriented frameworks. Programming techniques for constraint solving have been, and still are, in a period with rapid development of new efficient methods and paradigms from which language processing can profit. A common metaphor for human language processing is one big constraint solving process in which the different(-ly specified) linguistic and cognitive phases take place in parallel and with mutual cooperation, which fits quite well with current constraint programming paradigms.

It would be too much to claim that this volume gives an extensive overview of the area of constraint-based language processing, but one of our main goals with the publication is to give more attention to this important research direction and to provide an opportunity for researchers from different traditions and research environments to see themselves in this common trend. We can present a selection of interesting contributions, showing the spectrum from models grounded on cognitive studies to implementation-oriented formal models involving constraint programming. The often enthusiastic discussions at the workshop indicated a mutual interest and relevance across borders, and we are convinced that much more exciting research exists that can benefit from being brought into this forum. A second workshop on the topic is under preparation and we hope that the present volume can stimulate the interest.

We would like to thank the participants, the program committee, which is listed below, the invited speakers Philippe Blache, Veronica Dahl, Denys Duchier, and Gerald Penn, all researchers who submitted papers to the workshop, and those who made it practically possible.

Roskilde, March 2005

Henning Christiansen, Peter Rossen Skadhauge,

# Organization

## Organizing Committee, Editors

Henning Christiansen, Roskilde University (Chair)  
Peter Rossen Skadhauge, Copenhagen Business School  
Jørgen Villadsen, Roskilde University

## Programme Committee

Troels Andreasen, Roskilde, Denmark  
Philippe Blache, Aix-en-Provence, France  
Henning Christiansen, Roskilde, Denmark (Chair)  
Veronica Dahl, Simon Fraser University, Canada  
Denys Duchier, LORIA, France  
John Gallagher, Roskilde, Denmark  
Claire Gardent, LORIA, France  
Daniel Hardt, Copenhagen Business School, Denmark  
Jørgen Fischer Nilsson, Technical University of Denmark  
Kiril Simov, Bulgarian Academy of Science  
Peter Rossen Skadhauge, Copenhagen Business School, Denmark  
Jørgen Villadsen, Roskilde, Denmark

## Sponsors

*First International Workshop on Constraint Solving and Language Processing* was supported by

- the CONTROL project, CONstraint based Tools for RObust Language processing, funded by the Danish Natural Science Research Council,
- CMOL, Center for Computational Modelling of Language at Copenhagen Business School, and
- Computer Science Section at Roskilde University, that also hosted the workshop.

# Table of Contents

## Invited Papers

Property Grammars: A Fully Constraint-Based Theory <i>Philippe Blache</i> .....	1
An Abductive Treatment of Long Distance Dependencies in CHR <i>Veronica Dahl</i> .....	17
Metagrammar Redux <i>Benoit Crabbé, Denys Duchier</i> .....	32
The Other Syntax: Approaching Natural Language Semantics Through Logical Form Composition <i>Gerald Penn, Frank Richter</i> .....	48

## Contributed Papers

Gradiance, Constructions and Constraint Systems <i>Philippe Blache, Jean-Philippe Prost</i> .....	74
Problems of Inducing Large Coverage Constraint-Based Dependency Grammar for Czech <i>Ondřej Bojar</i> .....	90
Multi-dimensional Graph Configuration for Natural Language Processing <i>Ralph Debusmann, Denys Duchier, Marco Kuhlmann</i> .....	104
An Intuitive Tool for Constraint Based Grammars <i>Mathieu Estratat, Laurent Henocque</i> .....	121
Parsing Unrestricted German Text with Defeasible Constraints <i>Kilian A. Foth, Michael Daum, Wolfgang Menzel</i> .....	140
Animacy Information in Human Sentence Processing: An Incremental Optimization of Interpretation Approach <i>Monique Lamers, Helen de Hoop</i> .....	158

VIII Table of Contents

An Exploratory Application of Constraint Optimization in Mozart to Probabilistic Natural Language Processing <i>Irene Langkilde-Geary</i> .....	172
A Constraint-Based Model for Lexical and Syntactic Choice in Natural Language Generation <i>Véronique Moriceau, Patrick Saint-Dizier</i> .....	184
<b>Author Index</b> .....	205
