Preface

The 5th International Symposium on High Performance Computing (ISHPC-V) was held in Odaiba, Tokyo, Japan, October 20–22, 2003. The symposium was thoughtfully planned, organized, and supported by the ISHPC Organizing Committee and its collaborating organizations.

The ISHPC-V program included two keynote speeches, several invited talks, two panel discussions, and technical sessions covering theoretical and applied research topics in high-performance computing and representing both academia and industry. One of the regular sessions highlighted the research results of the ITBL project (IT-based research laboratory, <http://www.itbl.riken.go.jp/>). ITBL is a Japanese national project started in 2001 with the objective of realizing a virtual joint research environment using information technology. ITBL aims to connect 100 supercomputers located in main Japanese scientific research laboratories via high-speed networks.

A total of 58 technical contributions from 11 countries were submitted to ISHPC-V. Each paper received at least three peer reviews. After a thorough evaluation process, the program committee selected 14 regular (12-page) papers for presentation at the symposium. In addition, several other papers with favorable reviews were recommended for a poster session presentation. They are also included in the proceedings as short (8-page) papers.

The program committee gave a distinguished paper award and a best student paper award to two of the regular papers. The distinguished paper award was given for “Code and Data Transformations for Improving Shared Cache Performance on SMT Processors” by Dimitrios S. Nikolopoulos. The best student paper award was given for “Improving Memory Latency Aware Fetch Policies for SMT Processors” by Francisco J. Cazorla.

The third International Workshop on OpenMP: Experiences and Implementations (WOMPEI 2003) was held in conjunction with ISHPC-V. It was organized by Mitsuhsa Sato of University of Tsukuba, and Eduard Ayguadé of UPC. The ISHPC-V program committee decided to include the WOMPEI 2003 papers in the symposium proceedings.

We hope that the final program was of significant interest to the participants and served as a launching pad for interaction and debate on technical issues among the attendees. Last but not least, we thank the members of the program committee and the referees for all the hard work that made this meeting possible.

Foreword

I wish to welcome all of you to the proceedings of International Symposium on High Performance Computing 2003 (ISHPC-V), an event we were delighted to hold in Odaiba, a new city area of Tokyo. ISHPC 2003 was the fifth in the ISHPC series, ISHPC 1997 (Fukuoka, November 1997), ISHPC 1999 (Kyoto, May 1999), ISHPC 2000 (Tokyo, October 2000) and ISHPC 2002 (Kyoto, May 2002). The success of these symposia proves the importance of this area and indicates the strong interest of the research community. I am very pleased to serve as General Chair at a time when high-performance computing (HPC) plays a crucial role in the era of the “IT (Information Technology)” revolution.

The objective of this symposium was to provide a forum for the discussion of all aspects of HPC (from system architecture to real applications) in a more informal and friendly atmosphere. This symposium included excellent invited talks and workshops as well as high-quality technical papers. We hope that all the participants enjoyed not only the symposium but also the stay in Odaiba.

This symposium would not have been possible without the significant help of many people who devoted tremendous time and efforts. I thank all of those who worked diligently to make ISHPC 2003 a great success. In particular I would like to thank the Organizing Chair, Hideharu Amano of Keio University, and the Organizing Committee members for their great contribution to the planning and organization of ISHPC 2003. I would also like to thank the Program Chair, Alex Veidenbaum of UCI, the Program Co-chairs, Nicholas Carter of UIUC (architecture track), Jesus Labarta of UPC (software track), Yutaka Akiyama of CBRC (applications track), and the program committee members for their contribution to a technically excellent symposium program. Thanks are due to the Workshop Chairs, Mitsuhsa Sato of the University of Tsukuba and Eduard Ayguadé of UPC for organizing the International Workshop on OpenMP: Experiences and Implementations (WOMPEI 2003) as usual.

The ITBL special session was proposed and organized by Masahiro Fukuda of NAL. His contribution was very timely, as everybody is now looking at Grid Computing, and this made the symposium very practical. A last note of thanks goes to the people who were involved with the ITBL project.

October 2003

Hideo Aiso
General Chair

Organization

ISHPC–V Executive Committee

General Chair	Hideo Aiso (Tokyo U. of Technology)
Program Chair	Alex Veidenbaum (UCI)
Program Co-Chair	Nicholas Carter (UIUC)
	Jesus Labarta (UPC)
	Yutaka Akiyama (CBRC)
Organizing Chair	Hideharu Amano (Keio U.)
Publication and Treasury Chair	Kazuki Joe (NWU)
Local Arrangements Chair	Hironori Nakajo (TUAT)
Social Arrangements Chair	Mitaro Namiki (TUAT)
Workshop Chair	Mitsuhisa Sato (U. Tsukuba)
	Eduard Ayguadé (UPC)

ISHPC–V Program Committee

Hideharu Amano (Keio U.)	Ramon Beivide (U. Cantabria)
Taisuke Boku (U. Tsukuba)	Matt Frank (UIUC)
John Granacki (ISI/USC)	Alex Nicolau (UCI)
Sam Midkiff (Purdue U.)	Trevor Mudge (U. Michigan)
Hironori Nakajo (TUAT)	Hiroshi Nakashima (TUT)
Hitoshi Oi (Temple U.)	Alex Orailoglu (UCSD)
Constantine Polychronopoulos (UIUC)	Scott Rixner (Rice U.)
Hong Shen (JAIST)	Mateo Valero (UPC)
Rudolf Eigenmann (Purdue U.)	Jose Castaños (IBM)
Mario Furnari (CNR)	Dennis Gannon (U. Indiana)
Gabrielle Jost (NASA)	Manolis Katevenis (FORTH/U. Crete)
Hironori Kasahara (Waseda U.)	Uli Kremer (Rutgers U.)
Yoshitoshi Kunieda (Wakayama U.)	Ulrich Lang (U. Stuttgart)
Steve Lumetta (UIUC)	Allen Malony (U. Oregon)
Dimitris Nikolopoulos (CWM)	Leftaris Polychronopoulos (U. Patras)
Thierry Priol (INRIA)	Mitsuhisa Sato (U. Tsukuba)
Hamid R. Arabnia (U. Georgia)	Mitsuo Yokokawa (GTRC)
Stratis Gallopoulos (U. Patras)	Kyle Gallivan (FSU)

Table of Contents

I Invited Papers

High Performance Computing Trends and Self Adapting Numerical Software	1
<i>Jack Dongarra</i>	
Kilo-instruction Processors	10
<i>Adrián Cristal, Daniel Ortega, Josep Llosa, Mateo Valero</i>	
CARE: Overview of an Adaptive Multithreaded Architecture	26
<i>Andrés Márquez, Guang R. Gao</i>	
Numerical Simulator III – A Terascale SMP-Cluster System for Aerospace Science and Engineering: Its Design and the Performance Issue	39
<i>Yuichi Matsuo</i>	

II Award Papers

Distinguished Paper Award

Code and Data Transformations for Improving Shared Cache Performance on SMT Processors	54
<i>Dimitrios S. Nikolopoulos</i>	

Best Student Paper Award

Improving Memory Latency Aware Fetch Policies for SMT Processors	70
<i>Francisco J. Cazorla, Enrique Fernandez, Alex Ramírez, Mateo Valero</i>	

III Architecture

Tolerating Branch Predictor Latency on SMT	86
<i>Ayose Falcón, Oliverio J. Santana, Alex Ramírez, Mateo Valero</i>	
A Simple Low-Energy Instruction Wakeup Mechanism	99
<i>Marco A. Ramírez, Adrian Cristal, Alexander V. Veidenbaum, Luis Villa, Mateo Valero</i>	
Power-Performance Trade-Offs in Wide and Clustered VLIW Cores for Numerical Codes	113
<i>Miquel Pericàs, Eduard Ayguadé, Javier Zalamea, Josep Llosa, Mateo Valero</i>	

Field Array Compression in Data Caches for Dynamically Allocated Recursive Data Structures	127
<i>Masamichi Takagi, Kei Hiraki</i>	

IV Software

FIBER: A Generalized Framework for Auto-tuning Software	146
<i>Takahiro Katagiri, Kenji Kise, Hiroaki Honda, Toshitsugu Yuba</i>	
Evaluating Heuristic Scheduling Algorithms for High Performance Parallel Processing	160
<i>Lars Lundberg, Magnus Broberg, Kamilla Klonowska</i>	
Pursuing Laziness for Efficient Implementation of Modern Multithreaded Languages	174
<i>Seiji Umatani, Masahiro Yasugi, Tsuneyasu Komiya, Taiichi Yuasa</i>	
SPEC HPG Benchmarks for Large Systems	189
<i>Matthias S. Müller, Kumaran Kalyanasundaram, Greg Gaertner, Wesley Jones, Rudolf Eigenmann, Ron Lieberman, Matthijs van Waveren, Brian Whitney</i>	

V Applications

Distribution-Insensitive Parallel External Sorting on PC Clusters	202
<i>Minsoo Jeon, Dongseung Kim</i>	
Distributed Genetic Algorithm for Inference of Biological Scale-Free Network Structure	214
<i>Daisuke Tominaga, Katsutoshi Takahashi, Yutaka Akiyama</i>	
Is Cook's Theorem Correct for DNA-Based Computing?	222
<i>Weng-Long Chang, Minyi Guo, Jesse Wu</i>	
LES of Unstable Combustion in a Gas Turbine Combustor	234
<i>Jyunji Shinjo, Yasuhiro Mizobuchi, Satoru Ogawa</i>	

VI ITBL

Grid Computing Supporting System on ITBL Project	245
<i>Kenji Higuchi, Toshiyuki Imamura, Yoshio Suzuki, Futoshi Shimizu, Masahiko Machida, Takayuki Otani, Yukihiro Hasegawa, Nobuhiro Yamagishi, Kazuyuki Kimura, Tetsuo Aoyagi, Norihiko Nakajima, Masahiro Fukuda, Genki Yagawa</i>	

A Visual Resource Integration Environment for Distributed Applications on the ITBL System	258
<i>Toshiyuki Imamura, Nobuhiro Yamagishi, Hiroshi Takemiya, Yukihiro Hasegawa, Kenji Higuchi, Norihiro Nakajima</i>	
Development of Remote Visualization and Collaborative Visualization System in ITBL Grid Environment	269
<i>Yoshio Suzuki, Nobuko Matsumoto</i>	
Performance of Network Intrusion Detection Cluster System	278
<i>Katsuhiro Watanabe, Nobuhiko Tsuruoka, Ryutaro Himeno</i>	
Constructing a Virtual Laboratory on the Internet: The ITBL Portal	288
<i>Yoshinari Fukui, Andrew Stubbings, Takashi Yamazaki, Ryutaro Himeno</i>	
Evaluation of High-Speed VPN Using CFD Benchmark	298
<i>Nobuhiko Tsuruoka, Motoyoshi Kurokawa, Ryutaro Himeno</i>	
The Development of the UPACS CFD Environment	307
<i>Ryoji Takaki, Kazuomi Yamamoto, Takashi Yamane, Shunji Enomoto, Junichi Mukai</i>	
Virtual Experiment Platform for Materials Design	320
<i>Nobutaka Nishikawa, Masatoshi Nihei, Shuichi Iwata</i>	
<i>Ab Initio</i> Study of Hydrogen Hydrate Clathrates for Hydrogen Storage within the ITBL Environment	330
<i>Marcel H.F. Sluiter, Rodion V. Belosludov, Amit Jain, Vladimir R. Belosludov, Hitoshi Adachi, Yoshiyuki Kawazoe, Kenji Higuchi, Takayuki Otani</i>	

VII Short Papers

RI2N – Interconnection Network System for Clusters with Wide-Bandwidth and Fault-Tolerancy Based on Multiple Links	342
<i>Shin'ichi Miura, Taisuke Boku, Mitsuhsa Sato, Daisuke Takahashi</i>	
A Bypass-Sensitive Blocking-Preventing Scheduling Technique for Mesh-Connected Multicomputers	352
<i>Wei-Ming Lin, Hsiu-Jy Ho</i>	
Broadcast in a MANET Based on the Beneficial Area	360
<i>Gui Xie, Hong Shen</i>	
An Optimal Method for Coordinated En-route Web Object Caching	368
<i>Keqiu Li, Hong Shen</i>	

An Improved Algorithm of Multicast Topology Inference from End-to-End Measurements	376
<i>Hui Tian, Hong Shen</i>	
Chordal Topologies for Interconnection Networks	385
<i>Ramón Beivide, Carmen Martínez, Cruz Izu, Jaime Gutierrez, José-Ángel Gregorio, José Miguel-Alonso</i>	
Distributed Location of Shared Resources and Its Application to the Load Sharing Problem in Heterogeneous Distributed Systems	393
<i>Satoshi Fujita, Shigeaki Tagashira</i>	
Design and Implementation of a Parallel Programming Environment Based on Distributed Shared Arrays	402
<i>Wataru Kaneko, Akira Nomoto, Yasuo Watanabe, Shugo Nakamura, Kentaro Shimizu</i>	
Design and Implementation of Parallel Modified PrefixSpan Method	412
<i>Toshihide Sutou, Keiichi Tamura, Yasuma Mori, Hajime Kitakami</i>	
Parallel LU-decomposition on Pentium Streaming SIMD Extensions	423
<i>Akihito Takahashi, Mostafa Soliman, Stanislav Sedukhin</i>	
Parallel Matrix Multiplication and LU Factorization on Ethernet-Based Clusters	431
<i>Fernando G. Tinetti, Mónica Denham, Armando De Giusti</i>	
Online Remote Trace Analysis of Parallel Applications on High-Performance Clusters	440
<i>Holger Brunst, Allen D. Malony, Sameer S. Shende, Robert Bell</i>	
Performance Study of a Whole Genome Comparison Tool on a Hyper-Threading Multiprocessor	450
<i>Juan del Cuvillo, Xinmin Tian, Guang R. Gao, Milind Girkar</i>	
The GSN Library and FORTRAN Level I/O Benchmarks on the NS-III HPC System	458
<i>Naoyuki Fujita, Hirofumi Ookawa</i>	
Large Scale Structures of Turbulent Shear Flow via DNS	468
<i>Shin-ichi Satake, Tomoaki Kunugi, Kazuyuki Takase, Yasuo Ose, Norihito Naito</i>	
Molecular Dynamics Simulation of Prion Protein by Large Scale Cluster Computing	476
<i>Masakazu Sekijima, Chie Motono, Satoshi Yamasaki, Kiyotoshi Kaneko, Yutaka Akiyama</i>	

VIII International Workshop on OpenMP: Experiences and Implementations (WOMPEI 2003)

OpenMP/MPI Hybrid vs. Flat MPI on the Earth Simulator: Parallel Iterative Solvers for Finite Element Method	486
<i>Kengo Nakajima</i>	
Performance Evaluation of Low Level Multithreaded BLAS Kernels on Intel Processor Based cc-NUMA Systems	500
<i>Akira Nishida, Yoshio Oyanagi</i>	
Support of Multidimensional Parallelism in the OpenMP Programming Model	511
<i>Haoqiang Jin, Gabriele Jost</i>	
On the Implementation of OpenMP 2.0 Extensions in the Fujitsu PRIMEPOWER Compiler	523
<i>Hidetoshi Iwashita, Masanori Kaneko, Masaki Aoki, Kohichiro Hotta, Matthijs van Waveren</i>	
Improve OpenMP Performance by Extending BARRIER and REDUCTION Constructs	529
<i>Huang Chun, Yang Xuejun</i>	
OpenMP for Adaptive Master-Slave Message Passing Applications	540
<i>Panagiotis E. Hadjidoukas, Eleftherios D. Polychronopoulos, and Theodore S. Papatheodorou</i>	
OpenGR: A Directive-Based Grid Programming Environment	552
<i>Motonori Hirano, Mitsuhsa Sato, Yoshio Tanaka</i>	
Author Index	565
