Preface

The algebraic approach to system specification and development, born in the 1970s as a formal method for abstract data types, encompasses today the formal design of integrated hardware and software systems, new specification frameworks and programming paradigms (such as object-oriented, logic, and higher-order functional programming) and a wide range of application areas (including information systems, concurrent and distributed systems). Workshops on Algebraic Development Techniques, initiated in 1982 as Workshops on Abstract Data Types, have become a prominent forum to present and discuss research on this important area.

The 14th International Workshop on Algebraic Development Techniques (WADT'99) took place at the Château de Bonas, near Toulouse, September 15–18, 1999, and was organized by Didier Bert and Christine Choppy. The main topics of the workshop were:

- algebraic specification
- other approaches to formal specification
- specification languages and methods
- term rewriting and proof systems
- specification development systems (concepts, tools, etc.).

The program consisted of invited talks by Michel Bidoit, Manfred Broy, Bart Jacobs, Natarajan Shankar, and 69 presentations describing ongoing research. The parallel sessions were devoted to: algebraic specifications and other specification formalisms, test and validation, concurrent processes, applications, logics and validation, combining formalisms, subsorts and partiality, structuring, rewriting, coalgebras and sketches, refinement, institutions and categories, ASM specifications. There were also sessions reflecting ongoing research achieved in the Common Framework Initiative (CoFI, see <http://www.brics.dk/Projects/CoFI/>), within its different task groups: CASL (Common Algebraic Specification Language), CASL semantics, CASL tools, methodology, and reactive systems.

The program committee invited submissions of full papers for possible publication in this WADT volume on the basis of the abstracts and the presentations at WADT'99. All the submissions were subject to careful refereeing, and the selection of papers was made following further discussion by the full program committee. The authors of the 26 selected papers were asked to take account of the suggestions of the referees when preparing their final versions for inclusion in the present volume. The selected papers include three which are authored/co-authored by invited speakers at WADT'99.

We are extremely grateful to all the workshop participants, to the invited speakers, to the (other) members of the program committee, and to the external referees for their contribution to the scientific quality of the workshop and of this volume.

The workshop was organized by IFIP WG1.3 (Foundations of System Specification). It was sponsored by CoFI (Common Framework Initiative) ESPRIT Working Group 29432, and received financial support by CNRS (Centre National de la Recherche Scientifique), Ministère des Affaires Etrangères (French Government), IMAG Institute (Informatique et Mathématiques Appliquées de Grenoble), INPG (Institut National Polytechnique de Grenoble), UJF (Université Joseph Fourier de Grenoble), and the LSR laboratory (Logiciels, Systèmes, Réseaux).

We are grateful to Springer-Verlag for their helpful collaboration and quick publication.

We would like to thank Mme Simon and M. Wozniak at Château de Bonas for hosting the workshop with dedication and care, and for greatly facilitating the innumerable local organization tasks.

Finally, we thank all workshop participants both for lively discussions and for creating a friendly and warm atmosphere!

April 2000

Organization

Program Committee

Didier Bert	(Grenoble, France)
Michel Bidoit	(Cachan, France)
Christine Choppy	(Paris, France)
Hans-Jörg Kreowski	(Bremen, Germany)
Peter Mosses, <i>chair</i>	(Aarhus, Denmark)
Fernando Orejas	(Barcelona, Spain)
Francesco Parisi-Presicce	(Rome, Italy)
Donald Sannella	(Edinburgh, Scotland)
Andrzej Tarlecki	(Warsaw, Poland)

External Referees

Stuart Anderson	Martin Grosse-Rhode	Christoph Lueth
David Aspinall	Stefano Guerrini	Till Mossakowski
Paolo Baldan	Kathrin Hoffmann	Nikos Mylonakis
Marek Bednarczyk	Shi Hui	Catherine Oriat
Saddek Bensalem	Paul Jackson	Laure Petrucci
Paolo Bottoni	Peter Knirsch	Adolfo Piperno
Bettina Buth	Manuel Koch	Detlef Plump
Andrea Corradini	Alexander Kurz	Bernhard Reus
Sophie Coudert	Sabine Kuske	Jean-Claude Reynaud
Dominique Duval	Anna Labella	Burkhart Wolff
Hartmut Ehrig	François Laroussinie	Elena Zucca
Emanuela Fachini	Kazem Lellahi	
Marie-Claude Gaudel	John Longley	

Sponsoring Institutions

CoFI (Common Framework Initiative), ESPRIT Working Group 29432.
Ministère des Affaires Etrangères, French Government.
CNRS (Centre National de la Recherche Scientifique).
IMAG Institute (Informatique et Mathématiques Appliquées de Grenoble).
INPG (Institut National Polytechnique de Grenoble).
UJF (Université Joseph Fourier de Grenoble).
Laboratoire LSR (Logiciels, Systèmes, Réseaux), de Grenoble.

Table of Contents

Invited Topics

A Type-Theoretic Memory Model for Verification of Sequential Java Programs	1
<i>Joachim van den Berg, Marieke Huisman, Bart Jacobs and Erik Poll</i>	
From States to Histories	22
<i>Manfred Broy</i>	
Principles and Pragmatics of Subtyping in PVS	37
<i>Natarajan Shankar and Sam Owre</i>	

CASL: Language, Methodology and Tools

Extending Casl by Late Binding	53
<i>Davide Ancona, Maura Cerioli and Elena Zucca</i>	
Towards an Evolutionary Formal Software-Development Using CASL	73
<i>Serge Autelier, Dieter Hutter, Heiko Mantel and Axel Schairer</i>	
Development of Parsing Tools for CASL Using Generic Language Technology	89
<i>Mark G. J. van den Brand and Jeroen Scheerder</i>	
Using CASL to Specify the Requirements and the Design: A Problem Specific Approach	106
<i>Christine Choppy and Gianna Reggio</i>	
Subsorted Partial Higher-Order Logic as an Extension of CASL	126
<i>Till Mossakowski, Anne Haxthausen and Bernd Krieg-Brückner</i>	
Specifying Real Numbers in CASL	146
<i>Markus Roggenbach, Lutz Schröder and Till Mossakowski</i>	

Foundations

Specification Refinement with System F – The Higher-Order Case	162
<i>Jo Erskine Hannay</i>	
Guarded Algebras: Disguising Partiality so You Won't Know Whether Its There	182
<i>Magne Haveraaen and Eric G. Wagner</i>	
A General Completeness Result in Refinement	201
<i>Yoshiki Kinoshita and John Power</i>	

An Institution of Hybrid Systems	219
<i>Hugo Lourenço and Amílcar Sernadas</i>	
Realization of Probabilistic Automata: Categorical Approach	237
<i>Paulo Mateus, Amílcar Sernadas and Cristina Sernadas</i>	
Specifications in an Arbitrary Institution with Symbols	252
<i>Till Mossakowski</i>	
A General Algebraic Framework for Studying Modular Systems	271
<i>Fernando Orejas and Elvira Pino</i>	

Specification of Processes and Interactions

History Preserving Bisimulation for Contextual Nets	291
<i>Paolo Baldan, Andrea Corradini and Ugo Montanari</i>	
A Model for Interaction of Agents and Environments	311
<i>Alexander Letichevsky and David Gilbert</i>	
Algebra-Coalgebra Structures and Bialgebras	329
<i>Ataru T. Nakagawa</i>	
A Uniform Model Theory for the Specification of Data and Process Types	348
<i>Horst Reichel</i>	

Other Topics

Relating Abstract Datatypes and Z-Schemata	366
<i>Hubert Baumeister</i>	
Algebraic Specification of Operator-Based Multimedia Scenarios	383
<i>Didier Bert and Stéphane Lo Presti</i>	
Higher-Order Logic and Theorem Proving for Structured Specifications ...	401
<i>Tomasz Borzyszkowski</i>	
Extraction of Structured Programs from Specification Proofs	419
<i>John N. Crossley, Iman Poernomo and Martin Wirsing</i>	
Towards a Verification Logic for Rewriting Logic	438
<i>José Luis Fiadeiro, Tom Maibaum, Narciso Martí-Oliet, Jose Mesequer and Isabel Pita</i>	
The Rôle of Normalisation in Testing from Structured Algebraic Specifications	459
<i>Patricia D. L. Machado</i>
