#### **Preface**

Static analysis is a research area aimed at developing principles and tools for verification, certification, semantics-based manipulation, and high-performance implementation of programming languages and systems. The series of Static Analysis symposia has served as the primary venue for presentation and discussion of theoretical, practical, and application advances in the area.

This volume contains the papers accepted for presentation at the 11th International Static Analysis Symposium (SAS 2004), which was held August 26–28 in Verona, Italy. In response to the call for papers, 63 contributions were submitted from 20 different countries. Following on-line discussions, the Program Committee met in Verona on May 06, and selected 23 papers, basing this choice on their scientific quality, originality, and relevance to the symposium. Each paper was reviewed by at least 3 PC members or external referees. In addition to the contributed papers, this volume includes contributions by outstanding invited speakers: a full invited paper by Thomas Henzinger (University of Califorina at Berkeley), and abstracts of the talks given by the other invited speakers, Sheila McIlraith (University of Toronto), Ehud Shapiro (Weizmann Institute) and Yannis Smaragdakis (Georgia Institute of Technology).

On the behalf of the Program Committee, the Program Chair would like to thank all the authors who submitted papers and all external referees for their careful work in the reviewing process. The Program Chair would like to thank in particular Samir Genaim, who did an invaluable, excellent job in organizing the Program Committee meeting and the structure of this volume. We would like to express our gratitude to the *Dipartimento di Informatica* and to the *Università degli Studi di Verona*, in particular to Prof. Elio Mosele (president of the university), who handled the logistical arrangements and provided financial support for organizing this event.

SAS 2004 was held concurrently with LOPSTR 2004, International Symposium on Logic-Based Program Synthesis and Transformation; PEPM 2004, ACM SIGPLAN Symposium on Partial Evaluation and Program Manipulation; and PPDP 2004, ACM SIGPLAN International Conference on Principles and Practice of Declarative Programming. There were also several workshops in the area of programming languages. We would like to thank Sandro Etalle (LOPSTR PC Chair), Nevin Heintze and Peter Sestoft (PEPM PC Chairs), Eugenio Moggi (PPDP General Chair), Fausto Spoto (Organizing Chair), and David Warren (PPDP PC Chair) for their help in the organization aspects. Special thanks to all the members of the Organizing Committee who worked with enthusiasm in order to make this event possible and to ENDES, specifically to Anna Chiara Caputo, for the great job she did in the local organization.

## Organization

### Program Committee

Thomas Ball Microsoft, USA

Radhia Cousot Ècole Polytechnique, France Roberto Giacobazzi (Chair) Università di Verona, Italy Chris Hankin Imperial College London, UK

Thomas Jensen IRISA, France

Jens Knoop Technische Universität Wien, Austria

Giorgio Levi Università di Pisa, Italy

Laurent Mauborgne École Normale Supérieure, France

Andreas Podelski Max-Planck-Institut für Informatik, Germany

German Puebla Technical University of Madrid, Spain

Ganesan Ramalingam IBM, USA

Francesco Ranzato Università di Padova, Italy

Martin Rinard Massachusetts Institute of Technology, USA Andrei Sabelfeld Chalmers University of Technology, Sweden

Mary Lou Soffa University of Pittsburgh, USA
Harald Søndergaard University of Melbourne, Australia
Reinhard Wilhelm Universität des Saarlandes, Germany

## Steering Committee

Patrick Cousot École Normale Supérieure, France

Gilberto Filé Università di Padova, Italy David Schmidt Kansas State University, USA

### Organizing Committee

## **Table of Contents**

Invited Talks	
Injecting Life with Computers	1
The Blast Query Language for Software Verification  Dirk Beyer, Adam J. Chlipala, Thomas A. Henzinger, Ranjit Jhala, and Rupak Majumdar	2
Program Generators and the Tools to Make Them	19
Towards Declarative Programming for Web Services	21
Program and System Verification	
Closed and Logical Relations for Over- and Under-Approximation of Powersets	22
Completeness Refinement in Abstract Symbolic Trajectory Evaluation ${\it Mila~Dalla~Preda}$	38
Constraint-Based Linear-Relations Analysis	53
Spatial Analysis of BioAmbients	69
Security and Safety	
Modular and Constraint-Based Information Flow Inference for an Object-Oriented Language	84
Information Flow Analysis in Logical Form	100
Type Inference Against Races	116

T	• 1	A 1	
Р	ointer	Ana	IVSIS
-	OHITCH	7 III	., 515

Pointer-Range Analysis
A Scalable Nonuniform Pointer Analysis for Embedded Programs 149  Arnaud Venet
Bottom-Up and Top-Down Context-Sensitive Summary-Based Pointer Analysis
Abstract Interpretation and Algorithms
Abstract Interpretation of Combinational Asynchronous Circuits
Static Analysis of Gated Data Dependence Graphs
A Polynomial-Time Algorithm for Global Value Numbering
Shape Analysis
Quantitative Shape Analysis
A Relational Approach to Interprocedural Shape Analysis
Partially Disjunctive Heap Abstraction
Abstract Domain and Data Structures
An Abstract Interpretation Approach for Automatic Generation of Polynomial Invariants
Approximating the Algebraic Relational Semantics of Imperative Programs
The Octahedron Abstract Domain

Path-Sensitive Analysis for Linear Arithmetic and Uninterpreted Functions
Shape Analysis and Logic
On Logics of Aliasing
Generalized Records and Spatial Conjunction in Role Logic
Termination Analysis
Non-termination Inference for Constraint Logic Programs
Author Index
