PREFACE

ICALP-83 is the tenth International Colloquium on Automata, Languages and Programming in a series of meetings sponsored by the European Association for Theoretical Computer Science (EATCS). It is a conference covering all aspects of Theoretical Computer Science, including topics like automata theory, formal language theory, analysis of algorithms, computational complexity, computability theory, mathematical aspects of programming languages definition, semantics of programming languages, program verification, theory of data structure and theory of data bases. The previous meetings have been held in Paris (72), Saarbrücken (74), Edinburgh (76), Turku (77), Udine (78), Graz (79), Amsterdam (80), Haifa (81) and Aarhus (82).

ICALP-83 was organized by the Facultat d'Informàtica de la Universitat Politècnica de Barcelona, and was held in Barcelona from July 18th. to July 22nd. 1983. The organizing committee consisted of X.Berenguer, R.Casas, J.Diaz, F.Orejas and M.Verges.

ICALP-83 celebrate its tenth anniversary with a record of submitted abstracts and draft papers, 178, and a record of accepted papers, 59, that together with the two invited papers made the core of the colloquium. The program committee consisted of G.Ausiello (Roma), J.L.Boasson (Paris), C.Boehm (Roma), W.Brauer (Hamburg), J.Diaz (Barcelona)(chairman), S.Even (Haifa), P.Flajolet (Le Chesnay), E.Garcia Camarero (Madrid), R.Karp (Berkeley), B.Mayoh (Aarhus), K.Melhorn (Saarbrücken), J.Meseguer (Menlo Park), U.Montanari (Pisa), J.Nesetril (Praha), M.Nivat (Paris), C.Pair (Nancy), I.Ramos (Valencia) G.Rozenberg (Leiden), D.Scott (Pittsburgh), J.Ullman (Stanford), L.Valiant (Cambridge). Each paper was sent to at least four program committee members for evaluation. Based on these evaluations a selection committee consisting of G.Ausiello, J.L.Boasson, W.Brauer, J.Diaz, S.Even, P.Flajolet, B.Mayoh, U.Montanari, M.Nivat, I.Ramos, G.Rozenberg and D.Scott selected the papers presented at the conference. We wish to express our gratitude to the members of the program committee and the referees which assisted this process (see next page) for the enormous amount of work they invested in the evaluation process.

ICALP-83 was made possible by the support from a number of sources. We thank the Generalitat de Catalunya, The Spanish Ministry of Education, IBM-Spain, Sperry-Spain and Digital Corporation. We also want to thank the support given by all the members in the secretary of the Facultat d'Informàtica, specially Montserrat Bernat who controlled most of the organizational matters related to the conference.

Josep DIAZ,
ICALP-83

CONTENTS

Abramsky, A.		
On semantic foundations for applicative multiprogramming		1
Apt, K. & C.Delporte		
An axiomatization of the intermittent assertion method using temporal logic		15
Arnold, A.		
Topological characterizations of infinite behaviours of transition systems		28
de Bakker, J.W.; J.A.Bergstra; J.W.Klop& J.-J.Ch.Meyer		
Linear time and branching time semantics for recursion with merge		39
de Bakker, J.W.& J.I.Zucker		
Processes and fair semantics for the ADA rendez-vous		52
de Bra, P.& J.Paredaens		
Conditional dependencies for horizontal decompositions		67
Brookes, S.D.		
On the relationship of CCS and CSP		83
Brookes, S.D. & W.C. Rounds		
Behavioural equivalence relations induced by programming logics		97
Chandra, A.K., S.Fortune & R.Lipton		
Lower bounds for constant depth circuits for prefix problems		109
Choffrut, C. & J.Karhumäki		
Test sets for morphisms with bounded delay		118
Cohen, S.; D.Lehmann & A.Pnueli		
Symmetric and economical solutions to the mutual exclusion problem in a distributed system		128
Culik, K. & A.Salomaa		
Ambiguity and decision problems concerning number systems		137
Darondeau, Ph. & L.Kott		
On the observational semantics of fair parallelism		147
Dehne, F.		
An $O(N^4)$ algorithm to construct all Voronoi diagrams for K nearest neighbor searching		160
Delest, M.P. & G.Viennot		
Algebraic languages and polymino enumeration		173
Edelsbrunner, H. & E.Welzl		
On the number of equal-sized semispaces of a set of points in the plane		182
Ehrig, H.; E.G.Wagner & J.W.Thatcher		
Algebraic specifications with generating constraints		188

Fraenkel, A.S.	
Wythoff games, continued fractions, cedar trees and Fibonacci searches	203
Gabarro, J.	
Initial index: a new complexity function for languages	226
Ganzinger, H.	
Modular compiler descriptions based on abstract semantic data types	237
Gathen, von zur, J. & E. Kaltofen	
Polynomial-time factorization of multivariate polynomials over finite fields	250
Goltz, U. & W.Reisig	
Processes of place/transition - nets	264
Halpern, J.; Z.Manna & B.Moszkowski	
A hardware semantics based on temporal intervals	278
Hambrusch, S.E. & J.Simon	
Lower bounds for solving undirected graph problems on VLSI	292
Hart, S & M.Sharir	
Concurrent probabilistic program or: how to schedule if you must	304
Hartmanis, J. & Y.Yesha	
Computation times of NP sets of different densities	319
Hsiang, J. & N.Dershowitz	
Rewrite methods for clausal and non-clausal theorem proving	331
Indermark, K.	
Complexity of infinite trees	347
Jouannaud, J.-P.; C.Kirchner & H.Kirchner	
Incremental construction of unification algorithms in equational theories	361
Kamimura, T.	
Tree automata and attribute grammars	374
Kamimura, T. & A. Tang	
Effectively given spaces	385
Karhumäki, J.	
A note on intersections of free submonoids of a free monoid	397
Lang, H.W.; M.Schimmler; H.Schmeck & H.Schröder	
A fast sorting algorithm for VLSI	408
Latteux, M. & J.Leguy	
On the composition of morphisms and inverse morphisms	420
Le Rest, E. & S.W.Margolis	
On the group complexity of a finite language	433
