

Lecture Notes in Artificial Intelligence
Subseries of Lecture Notes in Computer Science
Edited by J. Siekmann

Lecture Notes in Computer Science
Edited by G. Goos and J. Hartmanis

Editorial

Artificial Intelligence has become a major discipline under the roof of Computer Science. This is also reflected by a growing number of titles devoted to this fast developing field to be published in our Lecture Notes in Computer Science. To make these volumes immediately visible we have decided to distinguish them by a special cover as Lecture Notes in Artificial Intelligence, constituting a subseries of the Lecture Notes in Computer Science. This subseries is edited by an Editorial Board of experts from all areas of AI, chaired by Jörg Siekmann, who are looking forward to consider further AI monographs and proceedings of high scientific quality for publication.

We hope that the constitution of this subseries will be well accepted by the audience of the Lecture Notes in Computer Science, and we feel confident that the subseries will be recognized as an outstanding opportunity for publication by authors and editors of the AI community.

Preface

JELIA 1990, les Journées Européennes sur la Logique en Intelligence Artificielle, or in another major European language, the European Workshop on Logics in AI, was held at the Centre for Mathematics and Computer Science (CWI) in Amsterdam, September 10–14, 1990.

The main conference themes were: 1. Logic Programming and Automated Theorem Proving, 2. Computational Semantics for Natural Language, 3. Applications of Non-Classical Logics, and 4. Partial and Dynamic Logics. The aim of the conference was to bring together researchers involved in developing logical tools for AI.

The conference was partially sponsored by the Esprit Basic Research Action 3175, DYANA (The Dynamic Interpretation of Language). Thanks are also due to the Royal Dutch Academy of Sciences (KNAW) for a grant in the form of a financial guarantee.

The call for papers resulted in 76 submissions, of which 30 were accepted for presentation, and 29 were actually given. All selected and presented papers are included in this volume, together with seven invited papers.

Amsterdam, November 1990

List of referees

Krzysztof Apt	Paul Yves Gloess
Y. Auffray	Franz Guenthner
Philippe Balbiani	J.J. Hébrard
Johan van Benthem	D. Herzig
Philippe Besnard	J. Jayez
Marc Bezem	Hans Kamp
G. Blanc	Claude Kirchner
G. Brewka	Hans Leiß
D.R. Busch	Witold Łukaszewicz
R. Demolombe	David Makinson
Oskar Doessler	G. Mirkowska
Jan van Eijck	H.J. Ohlbach
Peter van Emde Boas	Ewa Orłowska
Patrice Enjalbert	Michael Reinfrank
J.L. Ermine	Mark D. Ryan
Michel Eytan	Erik Sandewall
F. Fages	Philippe Smets
Luis Fariñas del Cerro	A. Skowron
G. Ferrand	Erik Tiden
L. Fribourg	M. Wójcik
Dov Gabbay	

Table of Contents

Invited Papers

Nicholas Asher and Michael Morreau <i>Commonsense Entailment: A Modal Theory of Nonmonotonic Reasoning</i>	1
J. Michael Dunn <i>Gaggle Theory: An Abstraction of Galois Connections and Residuation, With Applications to Negation, Implication, and Various Logical Operators</i>	31
Peter Gärdenfors <i>Belief Revision and Nonmonotonic Logic: Two Sides of the Same Coin? (Abstract)</i>	52
Jeroen Groenendijk and Martin Stokhof <i>Two Theories of Dynamic Semantics</i>	55
Tore Langholm <i>What is a Horn Clause in Partial Logic?</i>	65
Fernando C.N. Pereira <i>Semantic Interpretation as Higher-Order Deduction</i>	78
Vaughan Pratt <i>Action Logic and Pure Induction</i>	97

Selected Papers

Roland N. Bol <i>Loop Checking and Negation</i>	121
Wojciech Buszkowski <i>On Generative Capacity of the Lambek Calculus</i>	139
Ricardo Caferra and Nicolas Zabel <i>Extending Resolution for Model Construction</i>	153
Nick Davies <i>A First Order Logic of Truth, Knowledge and Belief</i>	170
J.P. Delahaye and V. Thibau <i>The Optimal Model of a Program with Negation</i>	180
Patrick Doherty <i>NM3 – A Three-Valued Cumulative Non-Monotonic Formalism</i>	196

Marta Fraňová <i>Constructive Matching – A Methodology for Inductive Theorem Proving</i>	212
Michael Freund and Daniel Lehmann <i>Deductive Inference Operations (Extended Abstract)</i>	227
Alan M. Frisch and Richard B. Scherl <i>A Constraint Logic Approach to Modal Deduction</i>	234
Claire Gardent <i>Dynamic Semantics and VP-Ellipsis</i>	251
Wiebe van der Hoek <i>Systems for Knowledge and Beliefs</i>	267
Zhisheng Huang and Karen Kwast <i>Awareness, Negation and Logical Omniscience</i>	282
Jan Jaspars <i>Theoretical Circumscription in Partial Modal Logic</i>	301
E. Laenens and D. Vermeir <i>A Logical Basis for Object Oriented Programming</i>	317
Gerhard Lakemeyer <i>A Computationally Attractive First-Order Logic of Belief</i>	333
Hans Leiß <i>Polymorphic Constructs in Natural and Programming Languages</i>	348
Zdravko Markov and Christo Dichev <i>The Net-Clause Language – A Tool for Data-Driven Inference</i>	366
Philippe Mathieu and Jean-Paul Delahaye <i>The Logical Compilation of Knowledge Bases</i>	386
J.-J.Ch. Meyer and W. van der Hoek <i>Non-Monotonic Reasoning by Monotonic Means</i>	399
Reinhard Muskens <i>Anaphora and the Logic of Change</i>	412
Ilkka Niemelä <i>Towards Automatic Autoepistemic Reasoning</i>	428

Uwe Petermann <i>Towards a Connection Procedure with Built in Theories</i>	444
Amir Rahat, Nissim Francez, Oded Shmueli <i>On the Equivalence of Deferred Substitution and Immediate Substitution Semantics for Logic Programs</i>	454
Munindar P. Singh and Nicholas M. Asher <i>Towards a Formal Theory of Intentions</i>	472
Z. Stachniak <i>Note on Effective Constructibility of Resolution Proof Systems</i>	487
Frans Voorbraak <i>The Logic of Objective Knowledge and Rational Belief</i>	499
Gerard Vreeswijk <i>A Complete Logic for Autoepistemic Membership</i>	516
Emil Weydert <i>Doxastic Preference Logic. A New Look at Belief Revision</i>	526
Cees Witteveen <i>Partial Semantics for Truth Maintenance</i>	544
