This special issue of Distributed Computing is based on papers that originally appeared as extended abstracts in the Proceedings of the 34th International Symposium on Distributed Computing (DISC 2020), held virtually on October 12–16, 2020.

The papers for the Special Issue were chosen by the Program Committee from the regular papers presented at the symposium, based on their quality and representation of the spectrum of topics encompassed by the symposium. In addition to being reviewed, in preliminary form, by the Program Committee, the full papers submitted for the Special Issue were refereed according to the standard practices of Distributed Computing.

We thank the program committee, the handling editors, the referees and the authors of these papers.
