Erratum to: Comput Visual Sci (2010) 13:187–205 DOI 10.1007/s00791-010-0141-5

The article contains a typo in Equation (2). The correct form reads

$$\mathbf{v}(p) = -K_h k r(\theta(p)) \nabla(p - z).$$

Unfortunately, the article contains a number of alterations and mistakes concerning layout and readability of the paper that appeared in the typesetting process without any approval of the authors. In the following, we point out some examples that might have an influence on how the article is perceived.

- The article was received on 16 May 2009.
- Inconsistent use of abbreviations, for example, use of “Section,” “Sect.” or “Sec.” has been introduced by the typesetters.

- Formulas (31) and (32) appear in a quite different style although their contents are very much the same.
- Figures 2 and 3 appear in a section that has nothing to do with the contents displayed in them. Their captions should start with “Brooks–Corey function.”
- Section 3.4 has been introduced by the typesetters and not by the authors. It distorts the contents of Section 3.3 of which it is supposed to be a (non-numbered) subsection only, just as *Finite element discretization* and *Monotone multigrid* are.
- The captions of Figs. 4 and 5 should start with “Inverse Kirchhoff transformation” and “Generalized saturation,” respectively.
