Preface

This volume contains papers selected for presentation at the 2004 Annual Conference of the European Association for Computer Science Logic, held on September 20–24, 2004 in Karpacz, Poland.

The CSL conference series started as the International Workshops on Computer Science Logic, and then, after five meetings, became the Annual Conference of the European Association for Computer Science Logic. This conference was the 18th meeting, and the 13th EACSL conference.

Altogether 99 abstracts were submitted, followed by 88 papers. Each of these papers was refereed by at least three reviewers. Then, after a two-week electronic discussion, the Programme Committee selected 33 papers for presentation at the conference. Apart from the contributed papers, the Committee invited lectures from Albert Atserias, Martin Hyland, Dale Miller, Ken McMillan and Paweł Urzyczyn.

We would like to thank all PC members and the subreferees for their excellent work.

The electronic PC meeting would not be possible without good software support. We decided to use the GNU CyberChair system, created by Richard van de Stadt, and we are happy with this decision. We also would like to thank Michał Moskal who installed and ran CyberChair for us. Finally, we would like to thank ToMasz Wierzbicki, who helped with the preparation of this volume.

We gratefully acknowledge financial support for the conference received from the Polish Committee for Scientific Research, and Wrocław University.
