# Preface

During the last two decades we have seen tremendous developments within software engineering research and practice. The ever increasing complexity of software systems and the revolutionary development in the Internet have led to many interesting challenges and opportunities for new developments in Software Process Technology.

Started in 1990, the primary goal of the European Workshops on Software Process Technology is to achieve better understanding of the state-of-the-art on all issues related to software process technology, including (but not limited to): process modeling languages, computer-supported process description, analysis, reuse, refinement and enactment, process monitoring, measurement, management, improvement and evolution, process enactment engines, tools, and environments. Besides the technical viewpoint, the workshops have also taken into account human and social dimensions in software process enactment.

The 9th European Workshop on Software Process Technology (EWSPT-9) provided an international forum for researchers and practitioners from academia and industry to discuss a wide range of topics in the area of software process technology, and to jointly formulate an agenda for future research in this field.

The Program Committee met in Portland, Oregon, USA during ICSE 2003, to select the papers for inclusion in the proceedings. Twelve papers (eleven research papers and one position paper) were selected out of 25 submissions from 12 countries (Australia, Austria, Brazil, China, Finland, France, Germany, Mexico, Norway, Spain, UK, USA). All submissions were reviewed by three members of the Program Committee. Papers were selected based on originality, quality, soundness and relevance to the workshop. In addition, the program included an invited talk by Volker Gruhn (University of Leipzig, Germany). Credit for the quality of the proceedings goes to all authors of the papers.

I would like to thank the members of the Program Committee (Jean-Claude Derriame, Jacky Estublier, Carlo Ghezzi, Carlo Montangero, Leon Osterweil, Dewayne Perry, and Brian Warboys) for providing timely and significant reviews, and for their substantial effort in making EWSPT-9 a successful workshop.

This year the workshop was held in conjunction with the joint European Software Engineering Conference and ACM SIGSOFT Symposium on the Foundations of Software Engineering. I would like to acknowledge the General Chair, Jukka Paakki, and the members of the Organizing Committee for their assistance during the organization of EWSPT-9 as a co-located workshop.

I would also like to acknowledge the prompt and professional support from Springer-Verlag, who published these proceedings in printed and electronic volumes as part of the Lecture Notes in Computer Science series.

# Program Committee

## Program Chair:

- Flavio Oquendo  
Université de Savoie – LISTIC, Annecy, France  
*flavio.oquendo@univ-savoie.fr*

## Committee Members:

- Jean-Claude Derniame  
LORIA/INPL, Nancy, France *derniame@loria.fr*
- Jacky Estublier  
IMAG – LSR, Grenoble, France  
*estublier@imag.fr*
- Carlo Ghezzi  
Politecnico di Milano, Italy  
*ghezzi@elet.polimi.it*
- Carlo Montangero  
Università di Pisa, Italy  
*cmontangero@di.unipi.it*
- Leon J. Osterweil  
University of Massachusetts, USA  
*ljo@cs.umass.edu*
- Dewayne E. Perry  
University of Texas at Austin, USA

# Table of Contents

## Invited Talk

Process Landscaping: From Software Process Modelling to Designing Mobile Business Processes . . . . .	1
<i>Volker Gruhn</i>	

## Research and Experience Papers

Empirical Validation of the Prospect Method for Systematic Software Process Elicitation . . . . .	4
<i>Ulrike Becker-Kornstaedt, Holger Neu</i>	
Formalizing Rework in Software Processes . . . . .	16
<i>Aaron G. Cass, Stanley M. Sutton Jr., Leon J. Osterweil</i>	
Lessons Learned and Recommendations from Two Large Norwegian SPI Programmes . . . . .	32
<i>Reidar Conradi, Tore Dybå, Dag I.K. Sjøberg, Tor Ulsund</i>	
An Approach and Framework for Extensible Process Support System . . . . .	46
<i>Jacky Estublier, Jorge Villalobos, Anh-Tuyet LE, Sonia Sanlaville, German Vega</i>	
Quality Ensuring Development of Software Processes . . . . .	62
<i>Alexander Förster, Gregor Engels</i>	
A UML-Based Approach to Enhance Reuse within Process Technology . . . . .	74
<i>Xavier Franch, Josep M. Ribó</i>	
Integrated Measurement for the Evaluation and Improvement of Software Processes . . . . .	94
<i>Félix García, Francisco Ruiz, José Antonio Cruz, Mario Piattini</i>	
Process Support for Evolving Active Architectures . . . . .	112
<i>R. Mark Greenwood, Dharini Balasubramaniam, Sorana Cîmpan, Graham N.C. Kirby, Kath Mickan, Ron Morrison, Flavio Oquendo, Ian Robertson, Wykeen Seet, Bob Snowdon, Brian C. Warboys, Evangelos Ziriintsis</i>	
Providing Highly Automated and Generic Means for Software Deployment Process . . . . .	128
<i>Vincent Lestideau, Nouredine Belkhatir</i>	

Flexible Static Semantic Checking Using First-Order Logic . . . . . 143  
*Shimon Rura, Barbara Lerner*

A Compliant Environment for Enacting Evolvable Process Models . . . . . 154  
*Wykeen Seet, Brian Warboys*

**Position Paper**

Decentralised Coordination for Software Process Enactment . . . . . 164  
*Jun Yan, Yun Yang, Gitesh K. Raikundalia*

Author Index . . . . . 173
