# Preface

The 8th ERCIM Workshop “User Interfaces for All” was held in Vienna, Austria, on 28–29 June 2004, building upon the results of the seven previous workshops held in Heraklion, Crete, Greece, 30–31 October 1995; Prague, Czech Republic, 7–8 November 1996; Obernai, France, 3–4 November 1997; Stockholm, Sweden, 19–21 October 1998; Dagstuhl, Germany, 28 November – 1 December 1999; Florence, Italy, 25–26 October 2000; and Paris (Chantilly), France, 24–25 October 2002.

The concept of “User Interfaces for All” targets a proactive realization of the “design for all” principle in the field of human-computer interaction (HCI), and involves the development of user interfaces to interactive applications and e-services, which provide universal access and usability to potentially all users. In the tradition of its predecessors, the 8th ERCIM Workshop “User Interfaces for All” aimed to consolidate recent work and to stimulate further discussion on the state of the art in “User Interfaces for All” and its increasing range of applications in the upcoming Information Society.

The emphasis of the 2004 event was on “User-Centered Interaction Paradigms for Universal Access in the Information Society.” The requirement for user-centered universal access stems from the growing impact of the fusion of the emerging technologies and from the different dimensions of diversity that are intrinsic to the Information Society. These dimensions become evident when considering the broad range of user characteristics, the changing nature of human activities, the variety of contexts of use, the increasing availability and diversification of information, knowledge sources and e-services, the proliferation of technological platforms, etc. The 8th ERCIM Workshop “User Interfaces for All” focused on the new HCI challenges arising from this evolution, and on how these affect the continuing efforts towards universal access in the Information Society.

Efforts towards universal access to Information Society technologies have met wide appreciation by an increasing proportion of the international research community, leading to various European and international research and policy initiatives, and to the establishment of forums for the diffusion and exchange of ideas and research results. These initiatives contribute to appropriating the benefits of the increasing international momentum and interest in the topics of universal design and universal access. Among them, the ERCIM working group on “User Interfaces for All” plays a catalytic role in bringing closer researchers and teams working in the different ERCIM organizations (but also organizations beyond ERCIM or the European boundaries), and sharing common interests and aspirations to contribute towards making the emerging Information Society equally accessible to all.

The 8th ERCIM Workshop “User Interfaces for All” attracted the strongest ever interest worldwide, with over 140 submissions from all over the world, covering a wide range of topics that include novel interaction paradigms and contexts of use, innovative concepts of universal accessibility and sociability, new modalities and dialogue styles, user-centered design in mobile application scenarios, late-breaking empirical results with respect to assessing universally accessible applications, and standardiza-

tion efforts. Contributions addressed not only technological solutions, but also design paradigms and empirical methods for evaluation, as well as policy developments. Reflecting this essential variety of topics, the workshop featured the two keynote speeches “Interface Design Strategies to Promote Learnability for All” by Prof. Ben Shneiderman (University of Maryland, USA) and “Online Communities for All” by Prof. Jenny Preece (University of Maryland Baltimore County, USA).

This volume is organized into five thematic sections:

- I Implementing user diversity. Contributions in this section investigate several important issues related to the varying characteristics and requirements of users of Information Society technologies, including cognitive assessment and personality profiling, individual differences and behavioral aspects of Web navigation, automated assessment of clinical populations, information needs of older users, and user requirements related to various types of cognitive impairments.
- II Adaptation and personalization. Contributions in this section discuss issues related to user interface and content adaptation for universal access. Addressed topics include adaptive user modeling, interaction monitoring and usage patterns extraction, personalization based on cognitive styles, user interface adaptation for mobile computing devices, and interrelationships between adaptation and accessibility.
- III Accessibility and usability of interactive applications and e-services. Papers in this section present methods, design guidelines and tools for accessibility and usability in the context of Web-based applications and services, and in particular in application domains such as education, health, and access to information.
- IV Universal access and design for all: guidelines, standards and practice. This section includes papers discussing issues of design inclusiveness, focusing on concrete practice, and standards elaboration and impact.

Novel interaction techniques, devices and metaphors. This section proposes a variety of novel approaches to user interaction, discussing topics such as extended functionality devices, force feedback devices, input rate enhancement techniques, visualization techniques in augmented reality, nomadic speech entry, haptic and audio-based interaction, and multimodality.

We would like to thank all the contributors and participants who made this workshop one of the most successful international events held so far regarding user-centered universal access. The atmosphere was characterized by in-depth and provoking presentations as well as fruitful cross-disciplinary discourse in a socially rewarding environment. We also wish to thank the members of the Programme Committee and all the reviewers for their dedicated efforts to maintain the high scientific quality of the event, as well as the invited speakers Prof. Ben Shneiderman and Prof. Jenny Preece.

# **8th ERCIM Workshop “User Interfaces for All”**

Vienna, Austria, 28–29 June 2004

Special Theme: “User-Centred Interaction Paradigms for Universal  
Access in the Information Society”

# Table of Contents

---

## Part I: Implementing User Diversity

---

Universal Access Through Client-Centred Cognitive Assessment and Personality Profiling . . . . .	3
<i>Ray Adams</i>	
A Study of Web-Based Information Needs of Senior Citizens in Singapore . . . . .	16
<i>Seck-Pin Chong and Yin-Leng Theng</i>	
Strategies for Finding Government Information by Older People . . . . .	34
<i>Paul Curzon, Suzette Keith, Judy Wilson, and Gill Whitney</i>	
Towards Universal Access Through Automated Assessment of Defined Clinical Populations . . . . .	42
<i>Michael C. Fairhurst, Sanaul Hoque, and Mohamed A. Razian</i>	
Sc@ut: Platform for Communication in Ubiquitous and Adaptive Environments Applied for Children with Autism . . . . .	50
<i>Miguel Gea-Megías, Nuria Medina-Medina, María Luisa Rodríguez-Almendros, and María José Rodríguez-Fórtiz</i>	
A Question of Realism . . . . .	68
<i>Richard Hetherington, Alison Crerar, and Phil Turner</i>	
Individual Differences and Behavioral Aspects Involved in Modeling Web Navigation . . . . .	77
<i>Ion Juvina and Herre van Oostendorp</i>	
Enabling Access to Computers for People with Poor Reading Skills . . . . .	96
<i>Albrecht Schmidt, Thorsten Kölbl, Siegfried Wagner, and Walter Straßmeier</i>	

---

## Part II: Adaptation and Personalisation

---

Personalisation Meets Accessibility: Towards the Design of Individual User Interfaces for All . . . . .	119
<i>Anita H.M. Cremers and Mark A. Neerincx</i>	
Interfacing the Interface: Unification Through Separation . . . . .	125
<i>David Crombie, Roger Lenoir, Neil McKenzie, and Klaus Miesenberger</i>	

Learning Usage Patterns for Personalized Information Access in e-Commerce . . .	133
<i>Marco Degemmis, Oriana Licchelli, Pasquale Lops, and Giovanni Semeraro</i>	
Adaptive User Modelling in AthosMail . . . . .	149
<i>Kristiina Jokinen, Kari Kanto, and Jyrki Rissanen</i>	
A Personalised Interface for Web Directories Based on Cognitive Styles . . . . .	159
<i>George D. Magoulas, Sherry Y. Chen, and Dionisios Dimakopoulos</i>	
Framework for User Interface Adaptation . . . . .	167
<i>Jing-Hua Ye and John Herbert</i>	
Interface Tailoring for Mobile Computing Devices . . . . .	175
<i>Jing-Hua Ye and John Herbert</i>	

---

### **Part III: Accessibility and Usability of Interactive Applications and e-Services**

---

Towards Guidelines for Usability of e-Learning Applications . . . . .	185
<i>Carmelo Ardito, Maria Francesca Costabile, Marilena De Marsico, Rosa Lanzilotti, Stefano Levialdi, Paola Plantamura, Teresa Roselli, Veronica Rossano, and Manuela Tersigni</i>	
An Empirical Methodology for Usability Analysis of a Touchscreen-Based Information Kiosk System for African Users with Low Levels of Computer Literacy . . . . .	203
<i>Pieter Blignaut</i>	
Using Automatic Tools in Accessibility and Usability Assurance Processes . . . . .	219
<i>Giorgio Brajnik</i>	
Accessibility in the Field of Education . . . . .	235
<i>Laura Burzagli, Pier Luigi Emiliani, and Paola Graziani</i>	
Supporting Web Usability for Vision Impaired Users . . . . .	242
<i>Francesco Correani, Barbara Leporini, and Fabio Paternò</i>	
Disability as a Vehicle for Identifying Hidden Aspects of Human Activity: Inclusive Design and Dyslexia in Educational Software Development . . . . .	254
<i>Mark Dixon</i>	
Designing Web-Applications for Mobile Computers: Experiences with Applications to Medicine . . . . .	262
<i>Andreas Holzinger and Maximilian Errath</i>	
Empirical Performance Analysis of Web Accessibility in Ubiquitous Information Network . . . . .	268
<i>Yung Bok Kim and Young-Han Kim</i>	

Designing and Implementing a Paradigm of Interactive and Communicative Cultural Playspaces in an On-Line Language Learning Program . . . . .	275
<i>Dimitris Toliás, George Exadaktylos, and Diana Slattery</i>	

---

## **Part IV: Universal Access and Design for All: Guidelines, Standards and Practice**

---

User Needs and e-Government Accessibility: The Future Impact of WCAG 2.0 . .	289
<i>Shane Anderson, Paul R. Bohman, Oliver K. Burmeister, and Gian Sampson-Wild</i>	
Inclusive Design in Industry: Barriers, Drivers and the Business Case . . . . .	305
<i>Hua Dong, Simeon Keates, and P. John Clarkson</i>	
The Role of Working Memory and Long Term Memory in Deaf Users' Hypertext Navigation: Review of Guidelines for Web Accessibility . . . . .	320
<i>Inmaculada Fajardo, Julio Abascal, and José J. Cañas</i>	
The Role of the Trust Intermediary in the Information and Knowledge Society . .	326
<i>Dino Giuli, Paolo Bussotti, Maria Chiara Pettenati, and Ioana Codoban</i>	
Developing BS7000 Part 6 – Guide to Managing Inclusive Design . . . . .	332
<i>Simeon Keates</i>	
Investigating the Inclusivity of Digital Television Set-Top Boxes . . . . .	340
<i>Simeon Keates</i>	
Methodological Approaches to Identify Honorable Best Practice in Barrier-Free Web Design – Examples from Germany's 1 <sup>st</sup> BIENE Award Competition . . . . .	360
<i>Michael Pieper, Renate Anderweit, Beate Schulte, Ulrike Peter, Jutta Croll, and Iris Cornelssen</i>	

---

## **Part V: Novel Interaction Techniques, Devices and Metaphors**

---

A Supportive Multimodal Mobile Robot for the Home . . . . .	375
<i>Lynne Baillie, Michael Pucher, and Marián Képesi</i>	
Multimodal Interaction in Architectural Design Applications . . . . .	384
<i>Lou Boves, Andre Neumann, Louis Vuurpijl, Louis ten Bosch, Stéphane Rossignol, Ralf Engel, and Norbert Pfleger</i>	
Audio Rendering of Mathematical Formulae Using MathML and AudioMath . . .	391
<i>Helder Ferreira and Diamantino Freitas</i>	
A Comparison of Prediction Techniques to Enhance the Communication Rate . .	400
<i>Nestor Garay-Vitoria and Julio Abascal</i>	

A Framework for Context-Sensitive Coordination of Human Interruptions in Human-Computer Interaction . . . . .	418
<i>Sonja Gievska and John Sibert</i>	
A Method to Extend Functionality of Pointer Input Devices . . . . .	426
<i>Oleg Gusyatin, Mikhail Urinson, and Margrit Betke</i>	
A New Visualization Concept for Navigation Systems . . . . .	440
<i>Wolfgang Narzt, Gustav Pomberger, Alois Ferscha, Dieter Kolb, Reiner Müller, Jan Wiegardt, Horst Hörtner, and Christopher Lindinger</i>	
Haptic and Spatial Audio Based Navigation of Visually Impaired Users in Virtual Environment Using Low Cost Devices . . . . .	452
<i>Vladislav Nemec, Adam J. Sporka, and Pavel Slavik</i>	
Data Entry on the Move: An Examination of Nomadic Speech-Based Text Entry . . . . .	460
<i>Kathleen J. Price, Min Lin, Jinjuan Feng, Rich Goldman, Andrew Sears, and Julie A. Jacko</i>	
Whistling User Interface (U <sup>3</sup> I) . . . . .	472
<i>Adam J. Sporka, Sri Hastuti Kurniawan, and Pavel Slavik</i>	
Use of Force Feedback Pointing Devices for Blind Users . . . . .	479
<i>Bertrand Tornil and Nadine Baptiste-Jessel</i>	
<b>Author Index</b> . . . . .	487
