Ole-Johan Dahl

Preface

After Ole-Johan's retirement at the beginning of the new millennium, some of us had thought and talked about making a "Festschrift" in his honor. When Donald Knuth took the initiative by sending us the first contribution, the process began to roll! In early 2002 an editing group was formed, including Kristen Nygaard, who had known Ole-Johan since their student days, and with whom he had developed the Simula language. Then we invited a number of prominent researchers familiar with Ole-Johan to submit contributions for a book honoring Ole-Johan on the occasion of his 70th birthday. Invitees included several members of the IFIP 2.3 working group, a forum that Ole-Johan treasured and enjoyed participating in throughout his career. In spite of the short deadline, the response to the invitations was overwhelmingly positive.

The original idea was to complete the book rather quickly to make it a gift he could read and enjoy, because by then he had had cancer for three years, and his health was gradually deteriorating. Kristen had been regularly visiting Ole-Johan, who was in the hospital at that time, and they were working on their Turing award speech. Ole-Johan was gratified to hear about the contributions to this book, but modestly expressed the feeling that there was no special need to undertake a book project on his behalf. Peacefully accepting his destiny, Ole-Johan died on June 29, 2002. Kristen, who was 5 years older than Ole-Johan, was still very active. Quite surprisingly, he died 6 weeks later of a sudden heart attack. During this short period, Norway lost its two greatest computer scientists.

We are grateful to all who helped with the book, especially all the contributors and the anonymous referees. Credit is due to Ellef Gjelstad, who helped with the preparation of the manuscript.

Table of Contents

A Biography of Ole-Johan Dahl	1
<i>Olaf Owe, Stein Krogdahl, and Tom Lyche</i>	
A Bibliography of Ole-Johan Dahl	8
<i>Olaf Owe, Stein Krogdahl, and Tom Lyche</i>	
The Birth of Object Orientation: the Simula Languages	15
<i>Ole-Johan Dahl</i>	
An Algebraic Theory of Actors and Its Application to a Simple Object-Based Language	26
<i>Gul Agha and Prasanna Thati</i>	
Towards Posit & Prove Calculi for Requirements Engineering and Software Design	58
<i>Dines Bjørner</i>	
Distributed Concurrent Object-Oriented Software	83
<i>Manfred Broy</i>	
Composing Hidden Information Modules over Inclusive Institutions	96
<i>Joseph Goguen and Grigore Roşu</i>	
Towards the Verifying Compiler	124
<i>Tony Hoare</i>	
Object-Oriented Specification and Open Distributed Systems	137
<i>Einar Broch Johnsen and Olaf Owe</i>	
SIMULA and Super-Object-Oriented Programming	165
<i>Eugene Kindler</i>	
Efficient Coroutine Generation of Constrained Gray Sequences	183
<i>Donald E. Knuth and Frank Ruskey</i>	
Consistency of Inheritance in Object-Oriented Languages and of Static, ALGOL-like Binding	209
<i>Hans Langmaack</i>	
The Power of Abstraction, Reuse, and Simplicity: An Object-Oriented Library for Event-Driven Design	236
<i>Bertrand Meyer</i>	

Iterative Synthesis of Control Guards Ensuring Invariance and Inevitability in Discrete-Decision Games	272
<i>Michel Sintzoff</i>	
Incremental Reasoning for Object Oriented Systems	302
<i>Neelam Soundarajan and Stephen Fridella</i>	
Pure Type Systems in Rewriting Logic: Specifying Typed Higher-Order Languages in a First-Order Logical Framework	334
<i>Mark-Oliver Stehr and José Meseguer</i>	
Building Optimal Binary Search Trees from Sorted Values in $O(N)$ Time	376
<i>Jean G. Vaucher</i>	
Author Index	389
