Preface

In the short space of about a decade, Commercial-Off-the-Shelf (COTS) software has evolved through being a relatively minor aspect of software development; a top-management-endorsed silver bullet solution for software development; a disruptive technology requiring people and organizations to extensively rethink their approaches to software development; to an increasingly well-understood software phenomenon for which effective solutions are being developed.

Part of this understanding has been to recognize that different COTS application sectors can be at different stages of this evolution. Some sectors are just beginning to become COTS-intensive. Some have evolved COTS solutions that are very well matched to their problem domain. Others, including most large-scale applications, still involve their developers in rethinking how to adapt their traditional software architectures, processes, management practices, and personnel skills to accommodate economically attractive but complex combinations of powerful but incompletely compatible and independently evolving COTS products.

The series of International Conferences on COTS-Based Software Systems (ICCBSS) has been established as a continuing forum for bringing together CBSS developers, suppliers, and researchers to summarize and discuss progress toward understanding and resolving CBSS problems. This year's conference theme, "Matching Solutions to Problems," reflects this objective. We have been fortunate to have three outstanding keynote speakers, David Carr, Tricia Oberndorf, and Douglas Schmidt, who have contributed significantly both in analyzing CBSS problems and developing better CBSS solutions.

The contributed papers and summaries of workshops, panels, and tutorials in these Proceedings give a good understanding of the nature and directions of evolution of CBSS problems and solutions. As has been my experience with previous ICCBSS Proceedings volumes, I believe that you will find lasting value in the content of the Proceedings.

I would like to express a special note of thanks to all of the members of ICCBSS 2004 organizing committee, program committee, and individual committees listed in the Proceedings. Their capable and dedicated volunteer efforts are what continues to make the ICCBSS series a timely and useful experience and contribution toward improved CBSS practices. I would also like to thank the Northrop Grumman Corporation for its sponsorship of ICCBSS 2004, and the overall sponsoring organizations of the ICCBSS series: the Canadian National Research Council, the CMU Software Engineering Institute, the European Software Institute, and the USC Center for Software Engineering.

January 2004

Barry Boehm, General Chair

Editors' Introduction

Welcome to the Proceedings for the 3rd International Conference of COTS Based Software Systems. The conference is still young, but it is vital and growing fast. This year there were a total of 57 submissions on all aspects of COTS, with about 60% of these coming from the United States and the remainder from Europe, and Asia. Equally encouraging, we had about equal numbers of submissions coming from academia and industry. This shows that ICCBSS is hitting our target audience-both practitioners and researchers interested in the effective use of COTS.

The specific program statistics are as follows:

- 4 tutorials submitted

- 3 tutorials accepted

- 4 panels submitted

- 3 panels accepted

- 10 experience presentations submitted

- 8 experience presentations accepted

- 39 refereed papers submitted

- 17 refereed papers accepted

- 2 invited workshops

We were uniformly impressed with the high quality and broad scope of these submissions. There were about an equal number of technically focused and managerially oriented submissions whose topics generally fell into three tracks: COTS Product Evaluation and Selection, COTS-Based System Definition and Development, and COTS-Based System Evolution and Management.

The superb quality of the submissions and the invited workshops continues to indicate the importance and interest in COTS based system development and issues. With this trend, ICCBSS 2005 will prove to be even more exciting!

Dan Port, Rick Kazman
ICCBSS Proceedings Editors

Organization

ICCBSS 2004 Conference Committee

Planning Committee

General Chair	Barry Boehm (University of Southern California)
Program Chairs	Ceci Albert (Software Engineering Institute) Dan Port (University of Hawaii)
Proceeding Chairs	Rick Kazman (University of Hawaii) Dan Port (University of Hawaii)
Tutorial Chair	Sergio Bandinelli (European Software Institute)
Panels Chair	Ioana Rus (University of Maryland)
Posters Chair	Hakan Erdogmus (National Research Council Canada)
Publicity Chairs	Lisa Brownsword (Software Engineering Institute) David Morera (European Software Institute) Mark Vigder (National Research Council Canada)
Finace & Local Arrangements	Hal Hart (Northrop Grumman)
Chair Emeritus	John Dean (National Research Council Canada)

Program Committee

Cecilia C. Albert – Software Engineering Institute, USA
Sergio Bandinelli – European Software Institute, Spain
David M. Bennett – POWERflex Corporation, Australia
David P. Bentley – South Carolina Research Authority, USA
Ljerka Beus-Dukic – University of Westminster, UK
Jørgen Bøegh – DELTA Danish Electronics, Light, & Acoustics, Denmark
Pere Botella – Universitat Politècnica de Catalunya Barcelona, Spain
William G. Chismar – University of Hawaii, USA
Daniel Dumas – IBM Belgium Software Group, Belgium
Anthony Earl – Sun Microsystems Inc, USA
Suellen Eslinger – The Aerospace Corporation, USA
Rose F. Gamble – University of Tulsa, USA
Suzanne M. Garcia – Software Engineering Institute, USA
Anatol Kark – National Research Council Canada, Canada
Rick Kazman – University of Hawaii and SEI, USA
David Klappholz – Stevens Institute of Tech. & New Jersey CSE, USA
Ron Kohl – R.J. Kohl & Associates, USA
Lech Krzanik – University of Oulu, Finland
Grace A. Lewis – Software Engineering Institute, USA
Fred Long – University of Wales, Aberystwyth

Mike Looney – University of Portsmouth, UK

Ray Madachy – University of Southern California, USA

Jean-Christophe Mielnik – Thales Research & Technology, France

Maurizio Morisio – Politecnico di Torino, Italy

Diane Mularz – MITRE Corp, USA

Michael Ochs – Fraunhofer-Institute for Experimental Software Engineering, Germany

Table of Contents

Tutorials

Using eCots Portal for Sharing Information about Software Products on the Internet and in Corporate Intranets	1
<i>Jean-Christophe Mielnik, Vincent Bouthors, Stéphane Laurière, Bernard Lang</i>	
Testing Component-Based Software – Issues, Challenges, and Solutions	2
<i>Jerry Zeyu Gao, Ye Wu</i>	
All You Have to Know When Using Commercial Components to Build Your Software Systems	3
<i>David Morera</i>	

Workshops

COTS Terminology and Categories: Can We Reach a Consensus?	4
<i>Betsy Clark, Marco Torchiano</i>	
First International Workshop on Incorporating COTS into Software Systems	6
<i>Alexander Egyed, Dewayne Perry</i>	

Panels

Panels Introduction	8
