Preface

This volume contains the accepted papers from the 3rd International School and Symposium on Advanced Distributed Systems held in Guadalajara, Mexico, January 24–30, 2004. This event was organized by the teams made up of members of CINVESTAV Guadalajara, CUCEI, the Computer Science Department of the Centre of Research and Advances Studies at the CUCEA campus of the University of Guadalajara, Mexico, the University of Rostock, Germany and ITESO, Guadalajara. The ISSADS symposium provides a forum for scientists and people from industry to discuss the progress of applications and theory of distributed systems. This year there were over 300 participants from 3 continents, among which about 20 percent came from industry.

The conference program consisted of 25 accepted papers out of 46 submissions and covered several aspects of distributed systems from hardware and system level up to different applications. These papers were selected by a peer review process, in which each paper was evaluated by at least three members of the international program committee.

In addition, the three invited speakers, Adolfo Guzman Arenas, Yakup Parker and Joaquin Vila, presented interesting overviews to current development and research directions in distributed systems. Furthermore, eight tutorials and four industrial forums from IBM, INTEL, HP and SUN enabled the participants to extend their knowledge in selected areas. A panel, which was organized by a team composed of researchers from the Universidad de Guadalajara and focused on traffic control and simulation, also demonstrated the practical application of recent research in distributed systems to the problems of Guadalajara.

At this moment, we would like to say thank you to all the members of the program and organizing committees as well as their teams, and we would like to show our particular gratitude to all those who submitted their papers to ISSADS 2004. Furthermore, we would like to acknowledge the local support from the Council of Science and Research of Jalisco, Mexico and the Jalisco Software Industry. Special thanks are also given to Yuniva Gonzalez and Cynthia Guerrero for their organizational support. We hope that all the participants enjoyed their stay in Mexico and benefited from fruitful discussions and a good time. We look forward to more new participants at the next ISSADS conference to be held again in Guadalajara, Mexico, in January 2005.

May 2004

Table of Contents

International School and Symposium on Advanced Distributed Systems

Myths, Beliefs and Superstitions about the Quality of Software and of Its Teaching <i>Adolfo Guzman Arenas</i>	1
Enhancing a Telerobotics Java Tool with Augmented Reality <i>Nancy Rodriguez, Luis Jose Pulido, and Jean-Pierre Jessel</i>	9
VIBES: Bringing Autonomy to Virtual Characters <i>Stéphane Sanchez, Hervé Luga, Yves Duthen, and Olivier Balet</i>	19
An Overview of the VIRTUOSI Toolkit <i>Alcides Calsavara, Agnaldo K. Noda, and Juarez da Costa Cesar Filho</i>	31
Assessing the Impact of Rapid Serial Visual Presentation (RSVP): A Reading Technique <i>Barbara Beccue and Joaquin Vila</i>	42
An Open Multiagent Architecture to Improve Reliability and Adaptability of Systems <i>Edson Scalabrin, Deborah Carvalho, Elaini Angelotti, Hilton de Azevedo, and Milton Ramos</i>	54
Toward a Generic MAS Test Bed <i>Juan Salvador Gómez Álvarez, Gerardo Chavarín Rodríguez, and Victor Hugo Zaldivar Carrillo</i>	67
State Controlled Execution for Agent-Object Hybrid Languages <i>Ivan Romero Hernandez and Jean-Luc Koning</i>	78
Cognitive Agents and Paraconsistent Logic <i>Elaini Simoni Angelotti and Edson Emílio Scalabrin</i>	91
A Multiagent Infrastructure for Self-organized Physical Embodied Systems: An Application to Wireless Communication Management <i>Jean-Paul Jamont and Michel Occello</i>	105
Tlachtli: A Framework for Soccer Agents Based on GeDa-3D <i>Francisco Ocegueda, Roberto Sánchez, and Félix Ramos</i>	118
Evaluating Location Dependent Queries Using ISLANDS <i>Marie Thilliez and Thierry Delot</i>	125

VIII Table of Contents

Conceptual Information Retrieval <i>Emerson L. dos Santos, Fabiano M. Hasegawa, Bráulio C. Ávila, and Fabrício Enembreck</i>	137
Semantic Search Engines <i>Alcides Calsavara and Glauco Schmidt</i>	145
The Internal-Local-Remote Dependency Model for Generic Coordination in Distributed Collaboration Sessions <i>José Martin Molina Espinosa, Jean Fanchon, and Khalil Drira</i>	158
About the Value of Virtual Communities in P2P Networks <i>German Sakaryan, Herwig Unger, and Ulrike Lechner</i>	170
Search in Communities: An Approach Derived from the Physic Analogue of Thermal Fields <i>Herwig Unger and Markus Wulff</i>	186
A Component-Based Design Approach for Collaborative Distributed Systems <i>Francisco Moo-Mena and Khalil Drira</i>	197
Architecture for Locating Mobile CORBA Objects in Wireless Mobile Environment <i>Mayank Mishra</i>	207
Integration of Load Balancing into a Parallel Evolutionary Algorithm <i>Miguel Castro, Graciela Román, Jorge Buenabad, Alma Martínez, and John Goddard</i>	219
Random Distributed Self-stabilizing Structures Maintenance <i>Thibault Bernard, Alain Bui, and Olivier Flauzac</i>	231
A New On-Line Scheduling Algorithm for Distributed Real-Time System <i>Mourad Hakem and Franck Butelle</i>	241
Facing Combinatory Explosion in NAC Networks <i>Jérôme Leboeuf Pasquier</i>	252
Multiple Correspondences and Log-linear Adjustment in E-commerce <i>Maria Beatriz Bernábe Loranca and Luis Antonio Olsina Santos</i>	261
A Distributed Digital Text Accessing and Acquisition System <i>Adolfo Guzmán Arenas and Victor-Polo de Gyves</i>	274
Author Index	285
