**Retraction Note to: Neural Comput & Applic (2013) 22:719–729**  
<https://doi.org/10.1007/s00521-011-0760-x>

The Editor-in-Chief has retracted this article [1] because it significantly overlaps with a large number of articles that were under consideration at the same time, including [2–5], and previously published articles, including [6]. Additionally, the article shows evidence of peer review manipulation. The authors have not responded to any correspondence regarding this retraction.
