I would like to start by wishing all our readers a happy, healthy, and prosperous 2020.

In this issue, we have two special sections. The first is concerned with software aging. I would like to thank the guest editors, Zheng Zheng and Kishor Trivedi, for bringing together a set of excellent papers on this crucial theme. The guest editors have provided an instructive introduction to guide your reading of this special section.

The second special section concerns test automation. I am very grateful to the guest editors, J. Jenny Li, Andreas Ulrich, Xiaoying Bai, and Antonia Bertolino, for all their hard work on eliciting and editing the papers for this section.

As always, I hope you enjoy reading these papers. Please contact me if you have any comments on this issue. My email is rachel.harrison@brookes.ac.uk.
