I hope that all our readers remain in good health and good cheer as this issue hits the press.

In this issue we have two special sections.

The first special section is concerned with Information Systems Quality. I must thank the guest editors, Mario Piattini, Ignacio García-Rodríguez de Guzmán, and Ricardo Pérez-Castillo for soliciting and editing this section. They have kindly provided an introduction to guide your reading.

The second special section concerns self-adaptive systems. The guest editors, Bernhard Peischl and Benedikt Eberhardinger, have worked hard to solicit these papers and edit this section. Again, they have provided a very helpful introduction to this special section, and I would like to thank them for all their hard work.

I hope you enjoy reading these papers. Please contact me if you have any comments on this issue. My email is [rachel.harrison@brookes.ac.uk](mailto:rachel.harrison@brookes.ac.uk).

**Publisher's note** Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
