Dear Fatih Porikli,

This is a request for information about any 2014 publications of yours that we can claim for the HERDC (Higher Education Research Data Collection). HERDC points bring us lots of money, and they're a significant indicator of our performance, so it's very important that we get a good return.

All 2014 publications for which you carried out some research at the College of Engineering and Computer Sciences (CECS) at the ANU count: books, book chapters, journal articles, and refereed conference papers.

For books we would like a pdf copy if possible (otherwise we will have to find a hard copy to scan). For journal articles, we need the title of the article, the journal, the volume, issue, and if possible a link. (A pdf would be helpful, but not needed if we can get it online.)

And could I ask you to fill in the template below, please?

Many thanks,

Rebecca Potter  
Publication Collections Officer  
School of Engineering and Computer Sciences

I certify that I carried out some aspects of the research leading to the following publication whilst I was at the School of Engineering and Computer Sciences, Australian National University.

Publication Type:	Journal Article
Publication Title:	Biomechanical model-based 4DCT simulation
Published in:	Bio-Imaging and Visualization for Patient-Customized Simulations
