Message from the Program Chairs EdgeCom 2020
CSCloud-EdgeCom 2020

I present my most sincere welcome to all attendees of this year's 2020 the 6th IEEE International Conference on Edge Computing and Scalable Cloud (IEEE EdgeCom 2020) at New York, USA. It is a great pleasure for me to welcome you on behalf of the Conference Committee. I am glad that we can have this multinational Conference at New York, USA.

The conference IEEE EdgeCom 2020 is the next edition of a series of successful academic events, followed by EdgeCom 2015 (New York, USA), EdgeCom 2016 (Beijing, China), EdgeCom 2017 (New York, USA), EdgeCom 2018 (Shanghai, China), and EdgeCom 2019 (Paris, France). We received over 85 research papers for this conference out of which fewer than 15 were accepted as full papers. The acceptance rate of IEEE CSCloud 2020 is 17.6%. The conferences address the contemporary rapid development of edge computing that has evolved to a new computing paradigm where computing tasks are completed closer to data sources (i.e. at edge) rather than in a centralized location (e.g. in cloud). Both industry and academia have a great demand addressing the edge computing. With this attention, building up edge computing systems in the connected environment like IoT become one of the mainstreams of computing. As a key technology, edge computing is playing an important role in determining future research and development activities in many academic and industrial branches. IEEE EdgeCom 2020 aims to attract recent academic achievements and feature the advances in edge computing or related topics in this year.

On behalf of the EdgeCom 2020 organizing committee, we are pleased to say thank you to each of you who have attended or contributed to this conference. We appreciate you for taking your time and efforts to make this academic event successful. We also want to express our gratitude for our conference committee members: General Chair Meikang Qiu; Workshop Chairs Keke Gai and Hongjun Dai; Publicity Chairs Peng Zhang, Zakirul Alam, Zhihui Lu, and Hua Huang; Local Chair Tao Zhang. We also owe special thanks to our sponsors: IEEE, IEEE Computer Society, IEEE TCSC, IEEE STC Smart Computing, and North America Chinese Talents Association.

I believe we have chosen a venue in which guarantees a successful technical conference amid the culture. With our charming venue, we are sure that you will enjoy your journey at IEEE EdgeCom 2020 for socializing with other scholars and gridding the academic social networks.
