

# Foreword

The very important success of the two former editions of the International Conference on Multimedia Computing and systems, namely, ICMCS'09 and ICMCS'12, which took place respectively in Ouarzazate (or Warzazat), Morocco in April 2-4, 2009 and Tangiers, Morocco in May 10-12, 2012, was a very good incentive for us to launch a third edition of this conference in an effort to make it a regular appointment for graduate students, scientists and engineers, from academia and industry. It is indeed a very good opportunity for them to expose their research findings and also to get exposed to the latest and emerging scientific and technological developments and trends in the field of Multimedia theory and technologies.

ICMCS'14 took place in the Moroccan imperial legendary city of Marrakech in April 14-16, 2014.

ICMCS'14 succeeded to bring together a record number (more than 320 people !) of researchers, developers, and practitioners from academia and industry working in all fields related with all facets of multimedia such as content authoring, processor technology, and systems design from.

ICMCS'14 provided an excellent networking opportunity among all these stakeholders. The conference also served as a forum for the dissemination of state-of-the-art research, development, and innovation of multimedia systems, technologies, and applications.

Last but not least, we would like to convey our most sincere thanks and gratitude to all the stakeholders of the success of this edition, and more specifically, to the organizing committee members, the TPC members for the timely and skillful review of ICMCS'14 papers, and also to the keynote speakers who gave it an excellent flavor.

## **ICMCS'14 General Chairmen**

### **Prof. Mohamed Essaaidi**

*Mohammed V University, Rabat, Morocco*

### **Dr. Youssef Zaz**

*Abdelmalek Essaadi University, tetuan, Morocco*
