## Corrections to “A Machine-Learning Approach to PolInSAR and LiDAR Data Fusion for Improved Tropical Forest Canopy Height Estimation Using NASA AfriSAR Campaign Data”

Maryam Pourshamsi, Mariano Garcia, Marco Lavalley, and Heiko Balzter

In the above article [1], the names of black and blue curves are given the other way around in the legend in Fig. 9. The blue curve should be PolInSAR Merged Height and the black one should be SVM Merged Height. The authors believe this happened following a typo in the coding. Below is the corrected figure:
