ITC 2013 Paper Awards

As part of the process of encouraging and appreciating the quality of written and presented work in the technical program, ITC presents awards to authors of regular technical papers given at the conference and published in the proceedings. In the process of determining the award winning papers, the ITC awards committee considers reviews and comments from several sources including:

- responses by conference attendees as recorded on the session ratings cards,
- observations and recommendations from select ITC program committee members.

For the **2012 ITC Ned Kornfield Best Paper Award**, the awards committee has chosen:

Algorithm for Dramatically Improved Efficiency in ADC Linearity Test
Z. Yu, D. Chen, Iowa State University

For the **Best Student Paper Award** the committee has selected:

Design Validation of RTL Circuits Using Evolutionary Swarm Intelligence
M. Li, K. Gent, M. Hsiao, Virginia Tech

ITC 2003 Most Significant Paper Award

The ITC Steering Committee established the Most Significant Paper Award to recognize authors of a paper published 10 years ago at ITC that was outstanding in:

- **Impact and Significance** – The paper was highly significant at the time of its publication. It had a big impact on major area of test research, methodology, applications, and test technology.
- **Relevance** – The paper is still extremely relevant today to research, development and advanced industrial practice.
- **Historical Interest** – The paper was the first or early report on a new concept, standard, or idea.

For the **2003 ITC Most Significant Paper Award**, the award committee has selected the following paper published at ITC 2003:

A Case Study of IR-Drop in Structured At-Speed Testing
*J. Saxena, K. Butler, V. Jayaram, S. Kundu, N. Arvind,
P. Sreeprakash, Texas Instruments; M. Hachinger, Siemens*

International Test Conference congratulates the authors of these papers for their achievements and for the outstanding quality of their work.
