

# Message from the CPSCoM 2021 Program Chairs iThings-GreenCom-CPSCoM-SmartData-Cybermatics 2021

It is our great honor and pleasure to welcome you to the 2021 IEEE International Conference on Cyber,Physical and Social Computing (CPSCoM 2021) hosted virtually due to COVID-19 pandemic on Dec. 06-08, 2021.

We have a truly exciting Technical Program for CPSCoM 2021. This year we have 66 papers submitted. All papers underwent a rigorous review process with at least three reviewers and went through a meta review by PC chairs and/or Track chairs. Eventually, 20 outstanding papers were accepted as FULL PAPER (30% acceptance rate) and 5 good papers were accepted as SHORT PAPER. A strong Program Committee of 40 Reviewers, 3 Program Chairs and 4 Track Chairs worked to assess the submissions.

We have organized the sessions to minimize potential topic overlap and hope that the attendees find a great deal of interesting and stimulating material in the technical program to keep them excited during and after the conference. Undoubtedly, organizing a conference on a scale such as CPSCoM 2021 is a challenging and demanding task. We would not have been able to accomplish such a task without the amazing contributions of our volunteers.

We wish to thank the members of the Organizing Committee for the tremendous amount of time and efforts spent into this process, making joint decisions and monitoring the process along the way. We are greatly in debt to all Chairs and the Reviewers for their dedicated work in the tremendous review process. Their contributions to CPSCoM 2021 are indeed invaluable.

To recognize research excellence, a number of paper awards will be awarded at the conference. Nominations were based on reviewers' scores and comments and were recommended by CPSCoM members.

Finally, our appreciation goes to the researchers worldwide who have contributed their excellent work to the outstanding Technical Program of CPSCoM 2021. We hope that you will enjoy the conference and find the technical program exciting.

James Zheng, Macquarie University, Australia  
Tom Luan, Xidian University, China  
Xiao Liu, Deakin University, Australia
