

A panel session—Security, privacy and the information processing system

SESSION CHAIRMAN—KENNETH ORR

Langston-Kitch and Assoc.

Panel Members

Jerry Hammett—Department of Defense

Daniel B. McGraw—Department of Administration

Andrew O. Atkinson—PROJECT CLEAR—Regional
Computation Center

Mark Gitenstein—Council Subcommittee on Constitutional
Rights, U.S. Senate

and Rights of Citizens,” on personal data systems the question of the individual’s right to privacy and methods of securing this right have taken on even greater importance to the information processing committee. The panelists will attempt to define security and privacy and to draw the distinction which makes them both severable and related. In the past it has been a contention that security of systems is a panacea to the protection of privacy. It is the contention of some of the panelists that this is not necessarily the correct assumption.
