

INFORMATION TECHNOLOGY

METHODS AND APPLICATIONS OF INFORMATICS AND
INFORMATION TECHNOLOGY

EDITORS-IN-CHIEF

Stefan Conrad, Düsseldorf

Hubert Mara, Halle

Paul Molitor, Halle

Ricardo Usbeck, Hamburg

EDITORIAL BOARD

Andreas Butz, München

Görschwin Fey, Hamburg

Ulrich Flegel, München

Andreas Herkersdorf, München

Anne Koziolk, Karlsruhe

Richard Lenz, Erlangen-Nürnberg

Ronald Maier, Innsbruck

Paul Müller, Kaiserslautern

Stefanie Rinderle-Ma, München

Falk Schreiber, Konstanz

HONORARY EDITOR

Heinz Zemanek†, Wien

DE GRUYTER
OLDENBOURG

it – Information Technology is a strictly peer-reviewed scientific journal. It is the oldest German journal in the field of information technology. Today, the major aim of it – Information Technology is highlighting issues on ongoing newsworthy areas in information technology and informatics and their application. It aims at presenting the topics with a holistic view. It addresses scientists, graduate students, and experts in industrial research and development.

it – Information Technology is the organ of the faculties Technical Informatics and Computer Science in the Life Sciences of the German Informatics Society (GI – Gesellschaft für Informatik e.V.) and faculty Technical Informatics of the Information Technology Society (ITG) within the VDE (Verband der Elektrotechnik, Elektronik und Informationstechnik e.V.).

it – Information Technology was founded as Elektronische Rechenanlagen in 1959. To live up to the changes in the scientific and technological world it changed its name and shape several times. In 1986 it became it – Informationstechnik and it+ti – Informationstechnik und Technische Informatik in 1993. In 2002, the journal got the current name it – Information Technology.

Contents

Special Issue: Machine Learning Applications

Guest editors: Natanael Arndt, Paul Molitor, Ricardo Usbeck

Editorial

Natanael Arndt, Paul Molitor and Ricardo Usbeck
Machine learning applications — 139

Lucas Weber and Richard Lenz

Machine learning in sensor identification for industrial systems — 177

Contributions to a thematic issue

Sebastian Karius, Mandy Knöchel, Sascha Heße and Tim Reiprich
Machine learning and cyber security — 142

Max Bartunik, Jens Kirchner and Oliver Keszocze
Artificial intelligence for molecular communication — 155

Florian Maurer, Moritz Thoma, Anmol Prakash Surhonne, Bryan Donyanavard and Andreas Herkersdorf
Machine learning in run-time control of multicore processor systems — 167

Martin Böckling, Heiko Paulheim and Sarah Detzler
Wildfire prediction for California using and comparing Spatio-Temporal Knowledge Graphs — 189

Hans Ole Hatzel, Haimo Stiemer, Chris Biemann and Evelyn Gius
Machine learning in computational literary studies — 200

Wolfgang Hildesheim, Taras Holoyad and Thomas Schmid
Machine learning in AI Factories - five theses for developing, managing and maintaining data-driven artificial intelligence at large scale — 218
