
FOREWORD

Special Section on Parallel and Distributed Computing and Networking

Most of recent computers are parallel computers, and the technology around parallel computing, distributed computing and networking have been widely utilized in daily life. A mobile phone with a dual-core processor activates the search engine working on large cloud servers through the wireless broadband network. Parallel computing, distributed computing and networking are closely-related areas of computing and their importance are ever-increasing. The objective of this special section is to publish the recent progresses in the interdisciplinary areas. We also expected that some authors would submit the extended versions of their papers presented in the second International Conference on Networking and Computing (ICNC2012), held in Okinawa during December 5 to 7, 2012, in addition to brand-new contributions from other IEICE members. A total of 48 papers and 9 letters were submitted from 8 different countries and areas across the world; e.g., Japan, China, Korea, Taiwan, Brazil, Malaysia, Thailand and USA. We are pleased to report that the number of papers from foreign countries were more than those from Japan. Each manuscript was carefully reviewed, and 21 papers and 2 letters were accepted for publication. We had to reject some of the interesting papers, since it is the editorial policy of IEICE transactions to reject a manuscript that requires a major revision. I hope I could see the revised versions of these manuscripts in the future issues of the IEICE transactions. It is my honor to serve as the guest editor-in-chief of this special section. I would like to thank all contributors who submitted their high-quality papers. Also, I wish to express my gratitude to the efforts and contributions of the reviewers and the guest associate editors. Finally, I am most grateful to guest editors, Dr. Hiroaki Inoue, Dr. Akihiro Fujiwara and Dr. Hiroko Midorikawa, for their devotion to this special section.

Special Section Editorial Committee Members

Guest Editors:

Hiroaki Inoue (NEC)

Akihiro Fujiwara (Kyushu Institute of Technology)

Hiroko Midorikawa (Seikei University)

Guest Associate Editors:

Akira Asato (FUJITSU LIMITED), Yutaka Arakawa (Kyushu University), Taisuke Izumi (Nagoya Institute of Technology), Shuichi Ichikawa (Toyohashi University of Technology), Yasushi Inoguchi (Japan Advanced Institute of Science and Technology (JAIST)), Yoshiaki Katayama (Nagoya Institute of Technology), Teruaki Kitasuka (Kumamoto University), Michihiro Koibuchi (National Institute of Informatics), Masahiro Sasabe (Osaka University), Ryota Shioya (Nagoya University), Yuichiro Shibata (Nagasaki University), Ryoichi Shinkuma (Kyoto University), Shigeaki Tagashira (Kansai University), Atsuko Takefusa (National Institute of Advanced Industrial Science and Technology (AIST)), Hidemoto Nakada (National Institute of Advanced Industrial Science and Technology (AIST)), Satoshi Fujita (Hiroshima University), Teruo Matsuzawa (Japan Advanced Institute of Science and Technology), Hiroaki Morino (Shibaura Institute of Technology), Toshihiro Yamauchi (Okayama University), Hirozumi Yamaguchi (Osaka University), Takashi Yokota (Utsunomiya University), Jacir Luiz Bordim (University of Brasilia)

Hideharu Amano (Keio University), Guest Editor-in-Chief

Hideharu Amano (*Member*) received the Ph.D. degree from the Dept. of Electronic Engineering from Keio University, Japan in 1986. He is currently a professor in the Dept. of Information and Computer Science, Keio University. His research interests include parallel architectures and reconfigurable systems.
