Editor's Message to Special Issue on Embedded Systems Engineering

Hironori Nakajo^{1,a)}

Embedded systems support our social life and industries as "brains" in a wide variety of electronic products such as automobile vehicles, home appliances, industrial equipment, and telecommunication devices. Research and development for these systems require innovative ideas to integrate overall technologies from hardware to software, from fundamentals to applications since embedded systems have to realize new services and features under severe physical and economic constraints. Establishing and advancing the embedded system engineering are crucial not only to develop better products but to keep competitiveness of industries. Although Japan allegedly has some strength in embedded system industry, overseas research activities for embedded systems, mainly in Europe and the U.S., have rapidly progressed, and a large number of outcomes have been published. It is critical vigorously to promote research in universities and research institutions in Japan.

In this special issue, we called for papers from industry and academia on a broad range of areas including hardware and software technologies, project managements, and human resources and educations related to embedded systems. Especially, we encouraged to submit papers presented in "Embedded System Symposium (ESS)," which is sponsored by Special Interesting Group on Embedded Systems in Information Processing Society of Japan.

The number of submitted paper is 9 and 4 excellent papers have been accepted. 20 reviewers assigned from the editorial committee shown below conducted peer-reviewing.

We should accelerate to establish embedded system technologies through collaboration between industry and educational institutions. Since the special issues activate the collaboration, we plan to continue publishing them twice a year.

We would like to express our sincere appreciation to all the authors for their contribution.

The Editorial Committee

• Editor in-Chief:

Hironori Nakajo (Tokyo University of Agriculture and Technology)

• Deputy Chief Editor:

Kiyofumi Tanaka (Japan Advanced Institute of Science and Technology)

Kenji Hisazumi (Kyushu University)

• Editorial Committee:

Takuya Azumi (Osaka University)

Masato Edahiro (Nagoya University)

Takeshi Ohkawa (Utsunomiya University)

Kouji Okino (Toyama Univerisity)

Kouichi Ono (IBM Research - Tokyo)

Kenji Kise (Tokyo Institute of Technology)

Takashi Kitamura (National Institute of Advanced Industrial Science and Technology)

Yoshinori Takeuchi (Kindai University)

Kenji Tei (National Institute of Informatics)

Natsuko Noda (Shibaura Institute of Technology)

Mikio Hashimoto (Toshiba Corp.)

Eiichi Hayakawa (Takushoku University)

Hiroaki Fukuda (Shibaura Institute of Technology)

Hiroki Matsutani (Keio University)

Yutaka Matsubara (Nagoya Univerisity)

Takanori Yokoyama (Tokyo City University)

Yasutaka Wada (Meisei University)

Tokyo University of Agriculture and Technology, Koganei, Tokyo 184–8588, Japan
