*SYNTHESIS LECTURES ON ARTIFICIAL INTELLIGENCE AND MACHINE
LEARNING #5*

ABSTRACT

Artificial systems that think and behave intelligently are one of the most exciting and challenging goals of Artificial Intelligence. *Action Programming* is the art and science of devising high-level control strategies for autonomous systems which employ a mental model of their environment and which reason about their actions as a means to achieve their goals. Applications of this programming paradigm include autonomous software agents, mobile robots with high-level reasoning capabilities, and General Game Playing. These lecture notes give an in-depth introduction to the current state-of-the-art in action programming. The main topics are

- knowledge representation for actions,
- procedural action programming,
- planning,
- agent logic programs, and
- reactive, behavior-based agents.

The only prerequisite for understanding the material in these lecture notes is some general programming experience and basic knowledge of classical first-order logic.

KEYWORDS

Agent programming, cognitive robotics, knowledge representation

Contents

1.	Introduction	1
2.	Mathematical Preliminaries	3
2.1	Logic	3
2.2	Logic Programming	4
3.	Procedural Action Programs	7
3.1	Setting the Stage: Defining Fluents and Actions	7
3.2	GOLOG Programs	10
3.3	Action Calculi	13
3.3.1	Signatures with Relational Fluents	13
3.3.2	Signatures with Functional Fluents	18
3.4	GOLOG Semantics	20
3.5	A GOLOG Interpreter	22
3.6	Extensions: Concurrency and Interrupts	25
3.6.1	Syntax	25
3.6.2	Semantics	28
3.7	Action Programs with Sensing	30
3.8	Exercises	33
4.	Action Programs and Planning	37
4.1	Planning with Plan Skeletons	37
4.2	Planning with Pruning	42
4.3	Planning with Preferences	45
4.4	Exercises	49
5.	Declarative Action Programs	51
5.1	Agent Logic Programs	51
5.2	ALP Semantics	53
5.2.1	Declarative Semantics	53
5.2.2	Operational Semantics	56
5.3	An ALP Interpreter	58
5.4	Agent Logic Programs with Sensing	62
5.5	Exercises	67

6.	Reactive Action Programs	69
6.1	BDI-Agents	69
6.2	AgentSpeak	71
6.2.1	Syntax	72
6.2.2	Operational Semantics	74
6.3	An AgentSpeak Interpreter	78
6.4	Spark	80
6.4.1	Syntax	80
6.4.2	Operational Semantics	82
6.5	Exercises	86
	Suggested Further Reading	87
	References	89
